NEW TOWN EMERGENCY ALERTING SYSTEM

A new Emergency Alerting System has been installed for use by the Terrace Bay Fire Department in case of fire or other emergencies. IN CASE OF FIRE IN TOWN TELEPHONE 3222.

Closed circuit telephone equipment has been installed at the guard station at the Mill. This closed circuit system is connected to the Fire Hall and the homes of the Fire Chief, the twelve volunteer firemen and the regular firemen. The Guard Station at the Mill is the control station for fires and emergencies.

In the event of fire or emergency the Guard Station and the Fire Hall receive the call simultaneously. At the Guard Station a call is placed on the closed circuit system. This alerts all firemen who are informed just where the fire is in the town. The firemen then proceed to the scene of the fire. At the same time the regular mill fire alarm system will go into operation, so that any town firemen who are in the Mill can be alerted.

When the required number of firemen are contacted instantly over the closed circuit telephone system the town fire siren will not be used. The siren will only be used if contact cannot be made immediately with the required number of firemen. The Mill whistle will not be used in the event of fire unless all other communication systems fail.

If the town siren sounds residents are asked not to phone the mill switchboard for information unless they are directly concerned with the fire. Information will not be given to anyone else.

The Township of Terrace Bay will pay for the rental of equipment involved in the Emergency Alerting System. There is no doubt that the Town now has a complete communication and alerting system, comparable with any other town in the Province.

MILL FIRE PROTECTION:

Since May 1st a revised fire alarm system has been adopted at the Kimberly-Clark Mill. The Mill volunteer fire crew procedures have also been revised so that the Mill fire alarm system and the fire crews are much more effective and efficient.

BUSH FIRE CONTROL:

In case of bush fires in the area a separate organization of manpower would be alerted. Here again the Mill Guard Station is the control centre. Kimberly-Clark Pulp & Paper Company purchased a two-way radio set, with two portable receivers and transmitters to be used at the scene of action. The base station is the Guard Station where crews and equipment can be controlled.

The changes or revisions in the fire-alerting systems have been co-ordinated by C. E. Paget of the Kimberly-Clark Pulp & Paper Co.

It is obvious that the town and Mill authorities have spent much time and money in assuring that Terrace Bay has the finest in communication equipment for use in case of emergencies. It is now up to each of us as individual residents to be alert to the dangers of fire, and to take all the common

sense precautions that are necessary to eliminate the hazards that could possibly cause one.

COMETS LOSE FIRST 1-0, SECOND RAINED OUT

Last Sunday afternoon at Chapple's Field in Fort William, the East Ends played host to the Terrace Bay Comets. The first game was a thriller from start to finish with the East Ends checking out a 1-0 victory. Kolody for the Comets and Scavarelli for the East Ends hooked up in a tight pitcher's dual. Although Kolody only allowed one hit, a throwing error by his team mates allowed one run to score. Terrace hitters got to Scavarelli for four hits but couldn't drive home a run. The second game was in the bottom of the third inning when the rains came and made the field unplayable. The score was 0-0 when the game was called with Taylor pitching for Terrace and Jarvis for the East Ends.

LAST REGULAR GAMES IN TERRACE THIS SUNDAY

This Sunday Terrace plays Westfort at Terrace Bay for the last regularly scheduled games here this season. A double win is a must if the Comets hope to make the playoffs. A good turn-out of fans is needed to help the boys get their two wins.

LEAGUE STANDINGS THROUGH GAMES PLAYED JULY 12

	GP	W	L	Pct.	GB
Red Sox	14	9	5	.643	
Westfort	13	8	5	.615	$\frac{1}{2}$
East Ends	17	10	7	.588	$\frac{1}{2}$
Red Rock	15	8	7	.533	$1\frac{1}{2}$
Terrace Bay	12	5	7	.417	3
Colonels	15	3	12	.200	$6\frac{1}{2}$

SEVENTH ACCIDENT OCCURS AT CAVERS HILL

On Sunday, July 12th at 4 P.M. a 1958 Chevrolet owned by Leo Tookenay of Schreiber was involved in an accident at the foot of Cavers Hill. It is believed that the operator of the vehicle, Vincent Tookenay, aged 18, failed to properly observe the warning and detour signs and was unable to reduce speed sufficiently to enable him to make the turn.

Treated for minor injuries by Dr. Blouw of Schreiber were, Vincent Tookenay, Melvin Tookenay, aged 15, James McCuaig, aged 17, and Bruce Gordon, aged 17. Marcel Tookenay, aged 13, the most seriously injured, was taken to Terrace Bay Private Hospital and later removed to McKellar Hospital in Fort William.

This accident is the seventh occurring on Cavers since highway construction started at that point. Motorists are urged to drive with care and pay particular attention to signs and warnings posted pointing out detours.

CHANGE IN BOAT FOR DERBY DRAW

The Kiwanis Club announced this week that they have decided to offer a larger and better Aluminum boat as a draw prize for the Terrace Bay Derby. The new boat will have the following specifications:-Length (Centerline) - 13' Beam - 55 $\frac{1}{2}$ ", Depth - 21", Weight - 152 lbs., Maximum Recommended H.P. - 25. This is a Thornes Model 13-50, SHORT-DECKED UTILITY MODEL. These boats are (Cont'd Page 2)
