

TOWN TOPICS (continued from Page 6)

and wearing rose accessories. Mrs. Tees was assisted by the groom's Mother who chose a two piece ensemble of blue silk with pink accessories. Both ladies wore corsages of pink roses.

The bride's table was covered with a lace cloth and centred with the three-tier wedding cake, surrounded in tulle and pink roses, and flanked by pink tapers and cut flowers. Mrs. G. Barrett, Grandmother of the bride, and Mrs. W. Montreul, the Groom's Aunt, poured tea during the reception, each lady presented with a corsage of yellow roses. Servitors were Misses Carolyn Boone, Pat Murphy, Gail Sweet and Jean Hopper, and the guest book was circulated by Miss Lorraine Nesbitt.

For the wedding trip to the States the bride travelled in a suit of pale green tweed with beige and white accessories, and she wore earrings of cultured pearls, the gift of the groom.

Previous to their marriage the bride was entertained with showers at the home of Mrs. E. Stachiw, & Mrs. Hugh Stewart of Schreiber. The Gift Room was presided over by Mrs. Dave Scown, Aunt of the Bride of Toronto.

Out-of-town guests included: Mr. and Mrs. G. Barrett of Niagara Falls, the Bride's Grandparents, Mr. and Mrs. Scown of Toronto, Mr. and Mrs. E. Nicol of Hurkett, Mr. and Mrs. W. Montreul of White River, Mr and Mrs. A. Dehl and Mr. and Mrs. J. Patterson of the Lakehead.

QUESTIONS THAT MAY BE ASKED ABOUT THE TUBERCULIN TESTWHY THE TUBERCULIN TEST?

For two reasons:

- (a) To find those who have been infected rather than after disease has developed.
- (b) To eliminate unnecessary x-rays for those under 40 years of age not yet infected.

WHAT IS MEANT BY FINDING THOSE WHO HAVE BEEN INFECTED?

Before one can develop tuberculosis, one must become infected. A tuberculin test given at the opportune time will show this infection months, even years ahead of the first sign of disease as revealed by a chest x-ray. For the millions of people of Ontario who are not yet infected, repeat tuberculin tests will give them early warning should they become infected during future years.

HOW ARE UNNECESSARY X-RAYS AVOIDED?

Those persons under 40 years of age who have been infected, as shown by a positive tuberculin reaction, as well as all over 40 years of age regardless of the results of the tests will be advised to have a chest x-ray. All others will be advised to have repeat annual tuberculin tests.

HOW WILL I KNOW IF I AM "POSITIVE"?

When you return to the clinic 2 to 4 days later, a doctor or nurse will examine your arm & tell you. Many times, only a trained examiner can distinguish between negative & positive reactions.

DON'T FORGET THE T.B. CLINIC OCTOBER 20 & 21.
