FIRE DEPARTMENT NEWS**"A Clean Home Seldom Burns"**

Before anyone leaves for holidays they should check to make sure they have left no oily or wax rags in their cupboards. This type of rag could cause a fire and with no one in the house to detect the smell of smoke it could be well developed before anyone could give an alarm. Papers etc. should also be put out in the garbage before you leave on holidays and anything else in the house that might be considered a fire hazard.

It is also a good idea to ask someone to have a look in your house from time to time while you are away. It is better to be safe than sorry. Unplug your radios, and TV sets. Also, don't get careless, just because you are on holidays. Be careful while using fires on picnics etc. Remember also to obey water safety rules when boating. In this way everyone will have a better, safer and accident free holiday.
