COUNCIL ANNOUNCES HYDRO BUILDING

The Utilities Committee of the Township of Terrace Bay is pleased to announce that construction of a Hydro Utilities Building is now under way. The building will be a two-story, masonry, office and shop.

The need for a building of this type has long been apparent. It will afford space for Utilities and some Municipal functions, the opportunity of housing their operations under one roof. The amalgamation of these facilities in one building will offer greater ease for administration and result in improved service to the community.

The arrangements to go ahead with the construction of the building were made through the Ontario Hydro Commission. Their role in the administration of local Hydro could be compared with that of an auditor. They are primarily interested to see that Hydro monies are used to the best possible advantage.

The Hydro account over the years has increased in value. At this time a surplus of \$85,000 in Hydro bonds has been accumulated. The end use of these funds is somewhat limited. After careful consideration a mutual agreement between Ontario Hydro and the Municipal Council was made. This was to the effect that a Hydro Utilities Building should be constructed at Terrace Bay.

The cost of the building, including land and architects' fees, will be close to \$55,000. Payment for the building will be made out of the present surplus. By the sale of these bonds the Hydro account will lose the annual interest -- approximately \$2,750 per year, due from this investment. In addition the cost of operating the building will add to this loss. On the other hand -- operating income from rentals will be sufficient to cover both building operation and maintain the income from bond interest.

The Terrace Bay Council reports that throughout negotiations with the Ontario Hydro, they were most co-operative and at all times expressed a genuine interest in the affairs of the local Hydro.

HYDRO OFFICIAL LAYS CORNERSTONE ON BUILDING

The Hon. W. Ross Strike, Q.C., Chairman of the Ontario Power Commission from Toronto laid the cornerstone for the new Utilities Building in Terrace Bay last Thursday morning at eleven before a group of Municipal representatives and public-spirited citizens. With the words "I declare this stone well and truly laid" and expressing his pleasure in the honor given to him in so doing, the cornerstone ceremony was completed.

Mr. Strike, however, went on to remind those present of his many visits to Terrace Bay from its very early days, and his continued interest and pleasure (Cont'd Page 9)

CANADA SAVINGS BONDS NOW ON SALE

For the 15th successive year employees of Kimberly-Clark are being given the opportunity to purchase Canada Savings Bonds by payroll deduction.

Everyone has something to save for -- a house, a car, taxes, education or a vacation to name but a few. And more and more people every year take advantage of this convenient method of saving. Last year over 56 percent of the mill payroll bought bonds.

By putting away only \$8.54 a month, by payroll deduction, you can have a fully paid up \$100 bond in 12 months, plus an interest coupon worth \$4.25.

Watchmen - A. Almos; Pulp Storage - J. Dejonghe;
Townsite - D. Laporte; Hotel - A. Papousek;
Hospital - M. Duquette; Technical - C. Rousseau;
Admin. Office - J. MacDonald.

These canvassers are doing this work voluntarily. Please be courteous and co-operative when you are contacted. If you are not canvassed and are interested in Bonds, contact the Employment Office.

SCHOOL FIRE DRILL AWARDS MADE

A very active Fire Prevention program is maintained in Terrace Bay the entire year, but special recognition is given during Fire Prevention Week and to the Town Fire Chief, Robert Hofland, and the Mill Fire Chief, George Maitland.

Drills in all three schools are conducted in a manner of utmost efficiency, the children quiet and regulated. Before the whistle dies away, any room could be observed with the children immediately rising and, as the first in line holds the door and filing out commences, others near the windows close them while someone near the light switch turns it off. The class registry was either carried out by the teacher or a previously designated pupil.

Timing between the schools is strongly competed for and at the Public (Cont'd P.9)
