A HAPPY LIFE

A happy life is to laugh often and to love much; to win the respect of intelligent persons and the affection of children; to earn the approbation of honest critics and to endure the betrayal of friends; to appreciate beauty; to find the best in everything; to give one's self; to leave the world a bit better, whether by a healthy child, a garden patch, or a redeemed social condition; to have played and laughed with enthusiasm and to have sung with exaltation; to know even one life has breathed easier because you have lived."
