

NEW RECREATION SYSTEM (Cont'd from Page 1)

Family lists are being completed to be sure that each member of every family will receive a disc, if they are Recreation AND/OR Pool Members.

Detailed explanations of the system will be distributed to member families prior to putting the system into operation.

Men's Fitness Classes every Thursday from 4:45 to 6:00 P.M. at the High School.

CHRISTMAS PARTY NEWS

Two Planning Meetings for the Annual Kimberly-Clark Children's Christmas Party have been held and plans for this year's party set.

Because of increased number of children in the age groups that have been served in past years, and because of the fact that a more economical pattern was required, plans for this year's party are quite different. It was the decision of the meeting that age groups for those who will meet Santa and receive gifts will be cut to 2 years to 9 years (inclusive), instead of 2 years to 12 years as in the past. This will allow for similar-type parties for the 2 to 9 children, following previous programmes.

Children over nine will be treated to a special Walt Disney production of a feature film and cartoons.

Only by following such a system would it be possible to see that the younger children still have an opportunity to receive gifts from Santa and that the older children also have a programme.

DATE OF THE PARTY WILL BE SATURDAY, DECEMBER 15th.

TIMES OF THE PARTIES WILL BE: 2 - 5 year olds - 10 A.M., 6 - 9 year olds - 11 A.M. Film SHOW for Older Children - 1 P.M.

WRAPPING OF GIFTS WILL BE DONE IN THE LARGE ROOM OF THE RECREATION CENTRE AT 2 P.M. ON THURSDAY, DECEMBER 13th.

We still require more helpers to assist on the day of the party, so if you can help, contact the Recreation Office.

FINAL DETAILS WILL APPEAR IN NEXT WEEK'S NEWS.

COUNCIL QUOTES

A Board of Health meeting preceded the regular meeting of Council Wednesday, afternoon in the Municipal Offices when Reeve J.P. Heenan and Councillors J. Wellings, A. Valiquette and A. Fraser received the report for last year of the M.O.H. Dr. D.J.M. McCausland as follows:

"In general, we have had more and varied infectious illnesses than usual during the year but in other respects, our health and sanitation record has been good.... Frequent visits were made to both Grade Schools by the school nurse, Mrs. Hopper, and myself. All new pupils were examined and immunizing injections given against poliomyelitis, tetanus, whooping cough, and diphtheria. Any defects noted were brought to the attention of the parents when remediable.

In addition, pupils of both grade schools and the High School were Tuberculin tested as well as some of the teachers. The few who had a positive reaction were given chest films. No cases of tuberculosis were discovered in the town during 1961.

Pre-school children received the usual immunization inoculations and small pox vaccinations throughout the year.

Many adults have had polio inoculations and some have been given influenza vaccine at cost.

There were four cases of scarlet fever and an outbreak of simple measles. The other common diseases, have been in the usual numbers.

Despite immunization, we had a minor outbreak of whooping cough though in a mild form. Fortunately, no infants were involved.

All three schools were found to be in excellent sanitary condition. The four local service stations were inspected and were found to be in good sanitary condition.

The lunch counter at the Recreation Centre has been inspected and bacterial counts done on plates, cutlery, and glasses. This was also done at the North Camp Cafeteria and the results in both cases were satisfactory.

A weekly inspection of the North Camp facilities, including kitchen, dining hall, meat storage, refrigerators, bedrooms, and snack bar was made.

Water samples were submitted to the Provincial Laboratory from the town water supply and reported to be excellent.

During 1961, there were 63 babies born in our hospital to Terrace Bay families and a total of 137 babies born. There were two newborn deaths, two stillbirths and eight deaths of adults and children.

Garbage collection and sewage disposal for the town are being carried out in a sanitary manner.

The Reeve questioned Dr. McCausland on some points where responsibility was not clear before requesting the School Nurse, Mrs. V. Hopper to present her annual report.
