#### HOUSE HOLD HINTS

When replacing a blown fuse, make sure that your hands are dry and that you are standing on a dry floor. If your fuse box is located in the basement and the floor tends to be damp, build a wood grating, or stand on dry paper or magazines, while changing your fuses.

#### Spotted Furniture

Water stains on furniture can be removed with hot vinegar. Rub over the spots, dry then polish with furniture polish or linseed oil. To remove water spots from varnished furniture, use ammonia water, followed by furniture polish.

#### Cracked China

Cracked china can often be saved by boil-

ing the piece in milk for a half-hour or so.

#### HUMOUR

In one of his anthologies of anecdotes, Bennet Cerf writes that Emily Kimbrough, the popular lecturer, was waiting to be introduced to an audience when a workman appeared carrying a screw-driver and beckoning to the chair-lady.

After a whispered conference between the two, the chairlady turned and spoke to the audience. "I am sorry," she said, "that there will be a slight delay. Word has just been given to me that there is a screw loose in our speaker."

It may be true that hard work is highly respectable but just try to make it popular.
