

**RECREATION BRIEFS** (Continued from page 7)

the Midgets and the Little Leaguers.

**Teen Town**

Another first for our local Teens was a very successful beach dance held over the weekend at the Kiwanis Beach. The dance was well supervised and everybody who did turn out was surprised to see the work put in to make this a successful event. The dancing was on a large platform on the Beach with special lighting provided by Kimberly-Clark Pulp & Paper Company. A large open Bar-B-Que stand was in operation, specializing with steak on a bun, hot dogs, coffee and corn on the cob. The Teen executive thank the many people who volunteered their help and the parents who were out to the dance.

The next big project with Teen Town is a Band-derama Festival on August 28th at the Terrace Bay Arena.

**HIGHWAY SAFETY NATIONAL CONTEST**

Ontario's participation in an intensive National Safety Contest and drive designed to set accident-free safety records in road and highway construction throughout this province begins Monday, August 23 through Friday, September 3.

Co-operating in the drive is the Construction Safety Associations of Ontario, whose weight and voice is added to help reduce the road accident toll in Ontario.

Special cash awards will be made to the road-building contractors' superintendents who can point to lowest accident rate during the contest.

**Terrace Bay Arena****Saturday, August 21st.**

**11th. Annual  
Horticultural Show**

**SAFETY FEATURES TO BE STANDARD EQUIPMENT**

Six additional safety features will become standard equipment on automobiles manufactured in Ontario during the 1966 model year.

Windshield washers, left outside rear-view mirrors, padded dashboards, padded sun visors, rear seat belts and back-up lights will become standard equipment during the 1966 model year on automobiles manufactured in this Province.

Individual manufacturers plan to provide further safety devices in addition to these items as either standard or optional equipment. Among these devices are multi-speed windshield wipers, improved windshield glass and safety door latches and hinges.

The 1966 models will be safest vehicles produced to date. Progress in vehicle safety has been substantial and it is anticipated that this progress will continue as rapidly as research makes it possible.

It is hoped that the increased attention on vehicle safety will also help to make drivers more conscious of their personal responsibilities and to remind them that the best single way they have to avoid accidents is to exercise deliberate care and common sense at all times.

**WANTED** - Young man to learn printing business. Must be good with machinery and willing to learn. Apply to Terrace Bay News - Post Office Building.
