**TERRACE BAY LADIES CHOIR RE-ORGANIZING**

The Harmony Belles (Terrace Bay) are inviting applications for membership for the coming season.

Anyone sixteen and over, interested in becoming a member, is invited to send their application to Box 579, Terrace Bay. The ability to sight read music is a decided asset but not absolutely essential. Please indicate which section (soprano, alto or second soprano) you would like to join.

Membership will be limited to twenty-four so please get applications in early.

**Bad public officials are elected by people who don't vote.**

**fashion news** BY NANCY GAYLORD

FASHION CONSULTANT TO THE 160 SINGER CENTERS IN CANADA.

Lise Lotte loves hearts... in fact so much that she puts at least one on every dress or fabric she designs. They are the trademark of this talented young lady from Copenhagen, once a model for Seventeen Magazine.

Everyone should have her own trademark. A favorite perfume is the choice of one young elegant I know. Others specialize in exotic hats, unusual shoes or handmade jewelry. One of the nicest ideas for a trademark is a personalized design formed by dialing your initials on the controls of the new Touch & Sew\* sewing machine by Singer. Forms a perfect border design for sheets, pillowcases, towels, lingerie, cocktail aprons and "you name it". I'm going to try it on a slither shift of linen... My own "trademark" forms a Spanish scrollwork design I'll use around neckline and sleeves.

**Planning a trip?** Never underestimate the possibilities of knits: nylon, Orlon, Arnel, cotton, wool and a host of others. All can be easily packed and come out wearable. Many are washable; some require little or no ironing. From swimming to cocktail hour, knits have the answer.

**Whether** you're planning a trip or just a comfortable stay-at-home, you'll find this trick handy. (I discovered it while travelling for a living.) After unpacking, put everything on

hangers. Turn on the shower (hot) until it's nice and steamy. Now hang all your clothes on the shower rod out of the way of the water. Removes wrinkles mass production style (especially in woolens) in about one minute.

**I have been told** that the fabric manufacturers have expansion plans for fall. We should find a greater variety of synthetic knits available for home sewing. If you don't find what you're looking for in your store, **ASK**. Our Singer store people, and many others, will stock the item you want if they receive enough requests.

When sewing knits, remember these tips:

1. Use a new needle and looser tension (practice on a piece of the fabric.)
2. Underline slim skirts or wear a fitted taffeta skirt underneath.
3. Iron-on interfacing works best around buttons and buttonholes, collars, cuffs and any other areas where a firm appearance is desired.
4. Make a tailor's hem: pink and machine stitch or zigzag raw edge of hem; then catch loosely to garment.

**To be a fashion leader** watch for:

- \* Bell and leg o' mutton sleeves
- \* Cuffed hip-hugger pants with stovepipe legs
- \* Bonnet hats and visor caps
