

next time you blow a fuse remember these facts before you blow your top

1 When a fuse blows it is a signal that you have overloaded part of your electrical system . . . a circuit.

2 If your home's electrical system is not adequate to serve all your needs you'll notice other symptoms: Lights may dim from time to time, your toaster will take longer to toast, and appliances with motors may appear sluggish.

3 If your home is more than 10 years old, the chances are your electrical system requires updating to take care of today's requirements. There are now more than twice the number of appliances used in the home than ten years ago.

SOLUTION

It is not necessary to put up with the inconvenience caused by an out-dated electrical system.

Have your household wiring examined soon. See how easily your home can be modernized electrically.

BENEFITS

1 You can use as many appliances as you wish at the same time . . . without giving fuses a second thought.

2 You can add any number of new time-saving appliances to your home.

3 Your appliances will operate more efficiently and with less strain on motors.

4 You can enjoy the convenience of having all the electrical outlets you desire. You will avoid the inconvenience of

unsightly extension cords and the attendant risk of overloading the outlet.

5 Additional comforts such as electric heating and air-conditioning can be easily accommodated.

6 Modernizing your wiring system will make an important difference to the safety and resale value of your home.

Re-wiring can be handled with little disturbance to your home and at a cost far less than you may think. Contact a qualified electrical contractor, soon. Or call your Hydro.
