COUNCIL QUOTES (from Page 4)

A letter from the Ontario Water Resources Commission reported that waste facilities at North Camp Dormitories are adequate. Copy of a letter from Mill Manager J. Ferrier to the Department of Highways gave results to date of a published request to report all accidents or near accidents occurring since June 15 at the Mill Road intersection, and offered another suggestion to help remedy the situation, that both signal blinkers be used for a specific number of yards when approaching the intersection. Councillors felt that the present

sand-bagging has only served to aggravate the situation.

Another copy of a letter from Mr. Ferrier thanked a party for his interest in the town but detailed reasons why establishing an over-night trailer camp in the location he would like to purchase were impractical.

Letters were sent to the Moose Lodge and Branch 223 Canadian Legion stating that, effective August 1967, council will accept no responsibility for maintenance of water utilities and that no future charges will be made since their premises are outside township service area. (continued on Page 8)
