O.E.C.T.A. HOLDS SCIENCE WORKSHOP

The Schreiber, Terrace Bay division of the Ontario English Catholic Teacher's Association held a Science Workshop in St. Martin's School on Friday evening and Saturday morning. The workshop was well attended by about thirty-five teachers from the public and separate schools of Terrace Bay, Nipigon, Red Rock and Schreiber. The Separate School Board of Schreiber was represented by Mr. J.T. Power.

The purpose of the workshop was to introduce teachers to the new approach and techniques currently being developed in the field of elementary

NOW \$21.00

led by Mr. Joe Barrata, who is presently the Vice-principal of St. Ignatius School in Port Arthur, and responsible for Science education within the school.

The new approach to science is concerned with the 'experiment, observation, inference' technique advocated in the Nuffield Science Program in England, which has been brought to Ontario and redeveloped to meet the needs of our children.

Once the opening address was given by Mr. H. Shack, the teachers spent most of Friday evening working to solve the same problems by experiment and improvisation, that the Grade 7 and 8 children of St. Ignatius School are presented with.

The Catholic Women's League were on hand to provide coffee and goodies late on Friday night, and first thing Saturday morning, but their coup de grace came later with a splendid turkey and ham salad luncheon.

During the Saturday morning session, a film of the 'Take 30' T.V. programme was shown which dealt with the operation of this new science program in a Toronto school. The film did much to evaluate the new programs and to compare it with the traditional approach to science education. Following a showing of Mr. Baratta's slides,
