

Rosspport - cont'd from page 18

Beardmore where Mr. Todesco accompanied J.R. Douglas on a fishing trip.

Mr. and Mrs. Chas Pronovoast spent the weekend with the latter's father, J. Lanktree in Port Arthur, as he is quite ill.

MacDiarmid visitors on the weekend were Mr. and Mrs. W. Schelling and Mr. and Mrs. E. Legault.

Keith Penner, Liberal candidate for the Thunder Bay riding, made a short visit to the village last Monday noon but plans on returning in the near future for meeting the villagers. While in town, he and Mr. H. McParlind had lunch with Mr. and Mrs. Todesco.

Gerald Brailsford of England, who is paddling from the Lakehead to Montreal in a kyak type boat, spent Sunday evening with Mr. and Mrs. Mac Hube-lit, who gave him his meals and lodging and sent him off early in his kyak, Monday morning, for Terrace Bay. He was held up most of the week between Nipigon and Rosspport due to the stormy weather. He spent two days at the Forestry depot at Pays Plat.

A party of eight men from Marian, Wisc. arrived this week on a fishing trip. Included in the party were Messers John, Mel and Jim Millbauer, Jason Pocket, B. Millar, Doug Millar, Harry Patzer and C. Millar.

Alfred Ray was a business visitor to Port Arthur Wednesday. Pat Auger visited relatives at Red Rock, and Port Arthur this week.

Walter Gerow of Wawa was home over the weekend. Jas. Zanni, Norman Willis, and Charlene Lowder of Fort William were guests of Mr. and Mrs. Peter Testori this week.

FOR SALE - one baby carriage - almost new - low priced. Phone Schreiber 291.

Recreation Briefs - cont'd from page 15

assisting with this programme deserve a lot of credit for their efforts. We hope to have the standings of the teams in next week's NEWS.

Playground Training Course - The North Shore Playground Leaders Training Course will be held again this year in Terrace Bay, from Tuesday, June 25th to Friday, June 28th. We will have approximately 35-40 persons in Terrace Bay for this course. The assistance of parents would be greatly appreciated in providing billets for these people. Sleeping

accommodation and breakfast will be required for these persons for Tuesday, Wednesday, Thursday and Friday morning. Payment for this accommodation will be \$2.00 per night per person. Please call the Recreation Office (3542) if you can accommodate anyone, and indicate whether you wish boys or girls.

Coming Events -

Saturday, June 8th - Navy League Annual Inspection

Saturday, June 8th - Regional Cub-a-Ree

Saturday, June 8th - Horticultural Club Sale of bedding plants in arena

Sunday, June 9th - Annual Moose Bowling Tournie

June 25 - 28th - North Shore Playground Training Course

July 1st - Kiwanis Annual Soap Box Derby

July 6 & 7th - Northwestern Ontario Competitive Swimming Clinic.

YOUR LAWN AND GARDEN CORNER - by Terrace Bay Horticultural Society

Since most gardens are now planted, it is time to give some thought to Lawns. Riding around town, one can notice here and there very nice lawns, without dandelions, and one would think they belong to wine makers, - but not so - they belong to people who learned the art of destroying them.

War with dandelions can be won, and many residents have results to back up that statement. The battle does not require much time and money, and June is a ripe time to start as dandelions are in succulent growing condition. Several products are available for control of dandelions and other weeds in lawns. Used as directed, they will kill many broad leaved weeds without harming the lawn grasses. The best known chemical is 2,4-D (dichlorophenoxy acetic acid) but several other growth-regulating chemicals such as MECOPROP and silver are useful. The growth-regulating chemicals not only kill the leaves and stems, but are absorbed, and move to all parts of the plant including the roots. All parts of weed are killed and regeneration is prevented. Due to large number of different formulations of 2,4-D etc., which are on the market, it is impossible to recommend the amount of product to use. The basic rate for control of lawn weeds with 2,4-D or MECOPROP is 16 ounces per acre, of the active part of the preparation, or approximately one-third ounce active per 1000 square feet. The directions on the label are based on this rate. When applying the above mentioned chemicals, care must be taken as wind-blown spray or fumes will injure or kill many garden plants and ornamentals - therefore spraying should be done only when there is little or no wind. Temperatures of from 70 - 80 degrees F are the best for spraying with 2,4-D. At cooler temperatures, results are obtained much more slowly, and spraying at higher temperatures may injure the grass. It is desirable to make the application at least four hours before rainfall so that the chemical may be absorbed by foliage. For the control of most lawn weeds one spraying is usually enough, but subsequent spot applications may be necessary. 2,4-D will not control chickweed and MECOPROP solution must be used to combat it.

Anybody wishing to have further information Re: Establishing and maintenance of Lawn, please phone 825-3507 and a booklet will be delivered in the near future.

There is still time to join the Horticultural Society and receive Shasta Daisies as premiums. Just phone 3306 and ask for membership, which is not restricted to Terrace Bay residents. Schreiber and Rosspport residents are welcome.
