## BETTER COLOR ON TV FROM CBC RESEARCH

The CBC expects better reception of color film programmes on TV from a research project recently completed by its engineers, according to Home Goods Retailing, weekly housefurnishing newspaper.

This project, conducted over the past two years, employed a McGill University computer programmed to calculate errors for a number of film test colors in certain types of TV cameras.

## RECREATION TIPS

Snowmobile accidents and fatalities continue to pile up in Ontario. Eight more deaths have occurred in the past two weeks since the last report on this subject was made public by the Ontario Safety League. Six of these fatalities occurred while snowmobiles were being operated on public thoroughfares, one happening at night during off-highway operation, and the remaining fatality being a drowning. To the League's knowledge, the total number of snowmobile deaths in Ontario during the current season is now up to twenty-nine. An estimate of non-fatal accidents while operating snowmobiles would be close to 300 for the current season. The above figures represent known fatal accidents and the non-fatal accident figure is estimated. The latter may be low as the accepted ratio of fatal to non-fatal accidents is 1 to 29. If this theory held true for snowmobiling, the number of non-fatal accidents would be in the area of eight or nine hundred. This may well be true as the vast majority of snowmobile accidents are not reported.

Pulp and paper mills in Canada use a quarter of the consumption of electricity in Canada and one-third of the power used by all industry.

## UPHOLSTERY COURSE A SUCCESS

A very successful upholstery workshop was held last weekend, with Mr. Littleford of the Chesterfield House in the Lakehead acting as instructor. We originally had an indication from thirty people that they would like to attend this workshop but, due to changes in circumstances, only ten people actually took this course.

However, according to their reports, each person felt this workshop was well worthwhile.

Those taking part were - Mr. and Mrs. Ted Brown, Mrs. A. Baron, Mrs. E. Sarenpaa, Mrs. F. Leibrock, Mr. R. Scowen, Mrs. A. Crockford, Mrs. H. Lohr and Mrs. Eva Connors.

## LADIES AFTERNOON RECREATION PLANNED

The final touches are being applied to the Shuffleboard courts in the large meeting room, (meeting room No. 1), and this room should be ready for operation on Monday of next week.

Those persons who indicated interest in this activity will be notified by telephone. In next week's NEWS we hope to print more information on the activities of this room.

Recreation Briefs - by D. Courtemanche

## CANADA PRODUCED

Canada Packers Limited have produced several NEW Films which are available for viewing by Groups and Organizations.

**LIVE and WORK  
THE SAFE WAY**

A highly interesting behind the scenes look at food processing. The film is of major interest to consumers.
