## How much home are you missing through outdated wiring?

When this house was built it was hard to imagine all the wonderful ways in which electricity would be serving us today. That's why the wiring in so many older homes just isn't adequate for today's needs.

There are many signs. Fuses blowing. Lights dimming. Appliances performing sluggishly. Cluttered extension cords. Not enough outlets.

So, if you're planning to modernize your home, think first of the wiring. Have a qualified electrical contractor check it. You'll be surprised at how easily and inexpensively it can be updated. The Hydro Finance Plan makes it easy to get started right away. Just ask your Hydro.

The Name of the Game is Electrical Living.
