## THEATRE COMPANY VISITS HIGH SCHOOLS

High School students in Schreiber and Terrace Bay were fortunate to have their school included in the itinerary of the Theatre Hour Company.

Travelling by bus and using their own stage in the high school gymnasium, the six artists presented five excerpts from the Twenty Centuries of Comedy.

Italian comedy "Pantalone Punished" from the sixteenth century; and English comedy "The Rivals" by Sheridan from the 18th century; a Russian comedy "The Marriage Proposal" by Anton Chekhov from the 19th century and the contemporary French comedy "The Bald Saprano" by Eugene Ionesco, written in 1950. The program also included a poem "Dentist and the Gas" by Stephen Leacock, as well as music and folksongs. The excerpts were varied and the acting tremendous."

## NEW TREATMENT FOR BIRTHMARKS

This may not come as a surprise to you, but those Canada Savings Bonds you've been buying have helped Government Scientists and Researchers to find a variety of time, money and life-saving instruments. For example, there's new hope for persons born with the port wine stain birthmark, that reddish purple discolouration that can range in size from the equivalent of a 25 cent piece to a vivid blotch covering the entire face. Up to now, there has been no completely satisfactory method of eradication. A newly-developed instrument by the Nation Research Council of Canada in Ottawa, can make good things happen.

Treatment other than by changing colour, adds both a contour and texture variation which has plagued plastic surgeons and patients because it created a secondary problem greater than the primary one.

As Canadians we are benefiting from the efforts being carried out by researchers both in industrial and medical fields, the effort to make good things happen. To make good things happen to you invest now in the current series of Canada Savings Bonds - certainly, they're better than ever!

## A NOTE TO PERSONS WHO MAY BECOME LOST

If you should become lost in the woods, keep in mind that your sense of hearing could help you find your way to safety. Listen for noises of trains, trucks, power saws, fire pumps, all which carry well.
