and cheer him on**

LETTER TO THE EDITOR

I believe that every individual or group has the right to fight for his rights but has Jack Cruickshank, on behalf of the students, the right to protest something that was signed away by the High School Board and Town Council who agreed, amid clapping and shouting, that we were going to have four-year courses right down the line and that Schreiber would have Business and Commerce plus the five-year general course. There was no fuss by your parents at that time who were quite happy.

Why all the fuss now? You kids should be thankful you have a bus to take you to school and a place to eat. In the past kids from Terrace Bay had to pay to ride to School in Schreiber and they didn't even have a gym to eat in.

Tax payers knew what the cost of up keep would be and I don't believe that this has changed.

The former High School Board knew when the agreement was reached that we did not have Grade 13 in Terrace Bay. Why didn't they insist at that time?

My advice to you is ask the former High School Board, ask at home, the people around you and your Township Council. The latter are at the present time trying to find a way to give away \$40,000 of the taxpayers money to open up Lakeview. If Council had spent so much effort at that time on High School affairs you kids would not be asking these questions now.

There will be more later on why give away tax money - a follow-up to my recent discussion with Council - after I return from Toronto.

W. Adamo

CARD OF THANKS - The family of the late Charles A. Simmer wish to thank all those who sent cards, flowers, baking or helped in anyway. Your kind words and deeds are very much appreciated.
