

**"MEAT SPECIAL" AT CACCAMO'S**

Caccamo's store in Terrace Bay have announced the appointment of Mr. Joe Figliomeni as head of their meat department.

Joe is an able and experienced meat cutter who has earned the title "Meat Specialist". He invites local residents to ask for suggestions or special cuts and, to back up his title promises to give customers their purchase free if they can stump him.

The Ontario Safety League claims that a March sun tan in Ontario is much more spectacular than even the Florida variety. But the same sun and wind that induces the tan can do plenty of damage to the eyes if not properly protected by tinted goggles. And don't let that warm sun on a southerly slope deceive you; the wind is still cold and the air has a chill in it. If you become overheated through exercise in the outdoors at this time of year, loosen the clothing around your throat to allow warm air to escape but keep the protection of windproof garments over the chest and body. March and the promise of spring warmth is deceptive, and over-exposure can end up in a bad case of pneumonia.
