

**HYDRO ANNOUNCES REVISION OF ELECTRICAL RATES**

The Township Hydro Department advised today that formal approval has been received from Ontario Hydro for a revision of electrical rates, effective October 1, 1970. The last rate adjustment was in April 1962.

Beginning with all bills issued on and after October 1st, the "discount" method of billing will be replaced by a net rate system, with a 5 per cent charge for late payment. All commercial and industrial customers will be combined into one general rate and minimum bills for all customers will be \$2.00 monthly.

Separate rates for commercial cooking, home heating and all-electric homes are eliminated in this streamlining of the schedule, along with flat rate water heaters.

All water heaters will now be metered. Electricians have been at work making this conversion over the past few weeks. Customers with approved water heaters will receive a special rate of .7¢ for 500 kilowatthours after the first 250 hours have been used. After 750 kilowatthours' monthly residential use, electricity will be provided at .9¢ per kilowatthours, the same as since 1962. For 750 kilowatthours' consumption, which cost \$7.56 previously, the new amount, including approved metered water heating, will be \$7.90.

The Township Hydro System has been subject to the same inflationary pressures of higher costs for labour and materials as any other enterprise. We have been continued next column .....

**Canadian Radio-Television Commission**

The Canadian Radio-Television Commission announces the following decision:

**Decision CRTC 70-217**
