

EDUCATIONAL TELEVISION AT T.B.H.S.

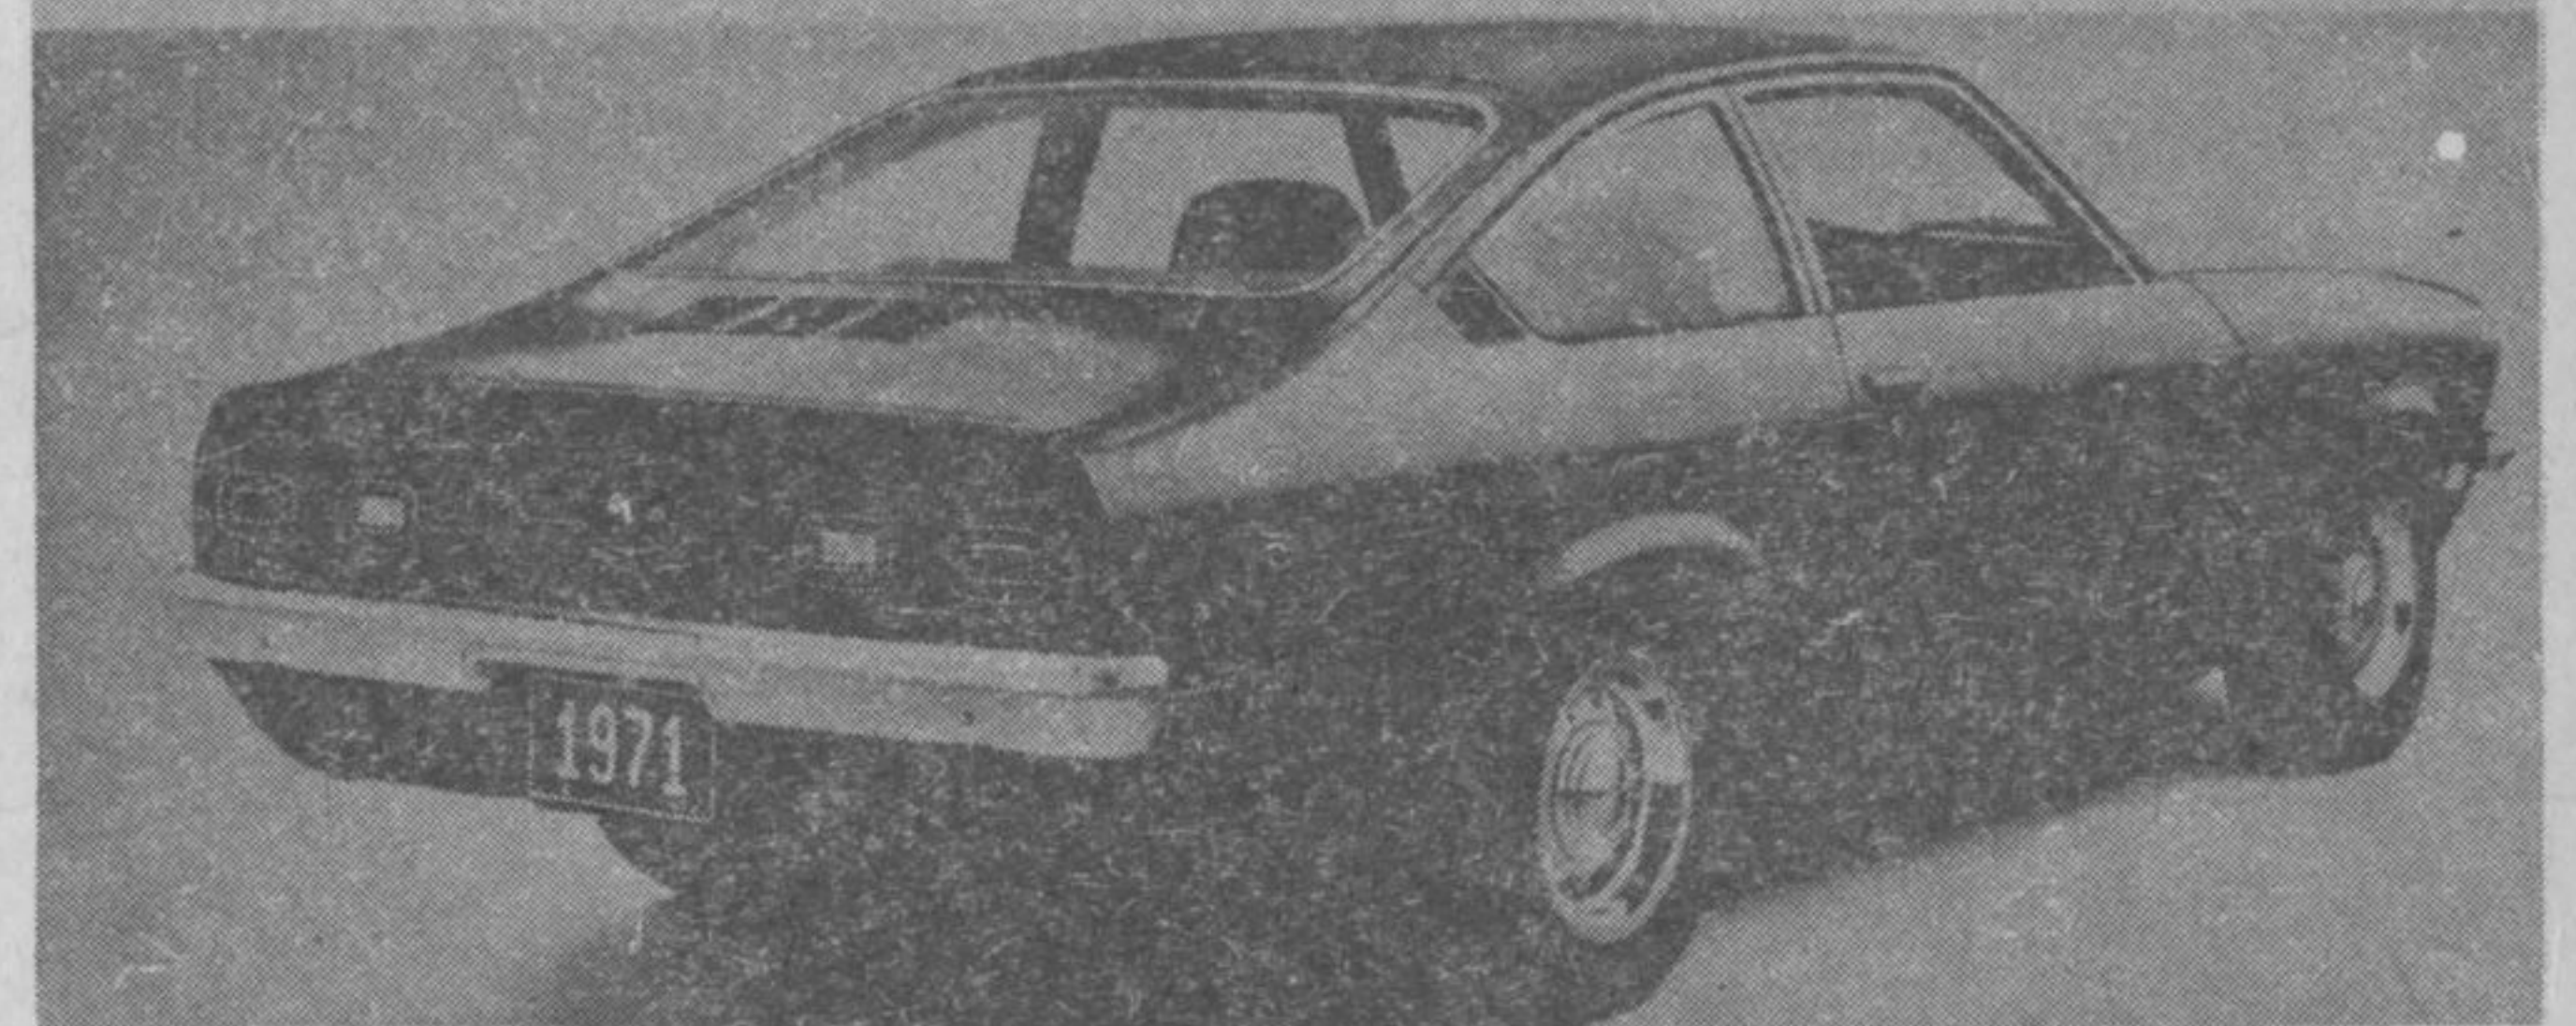

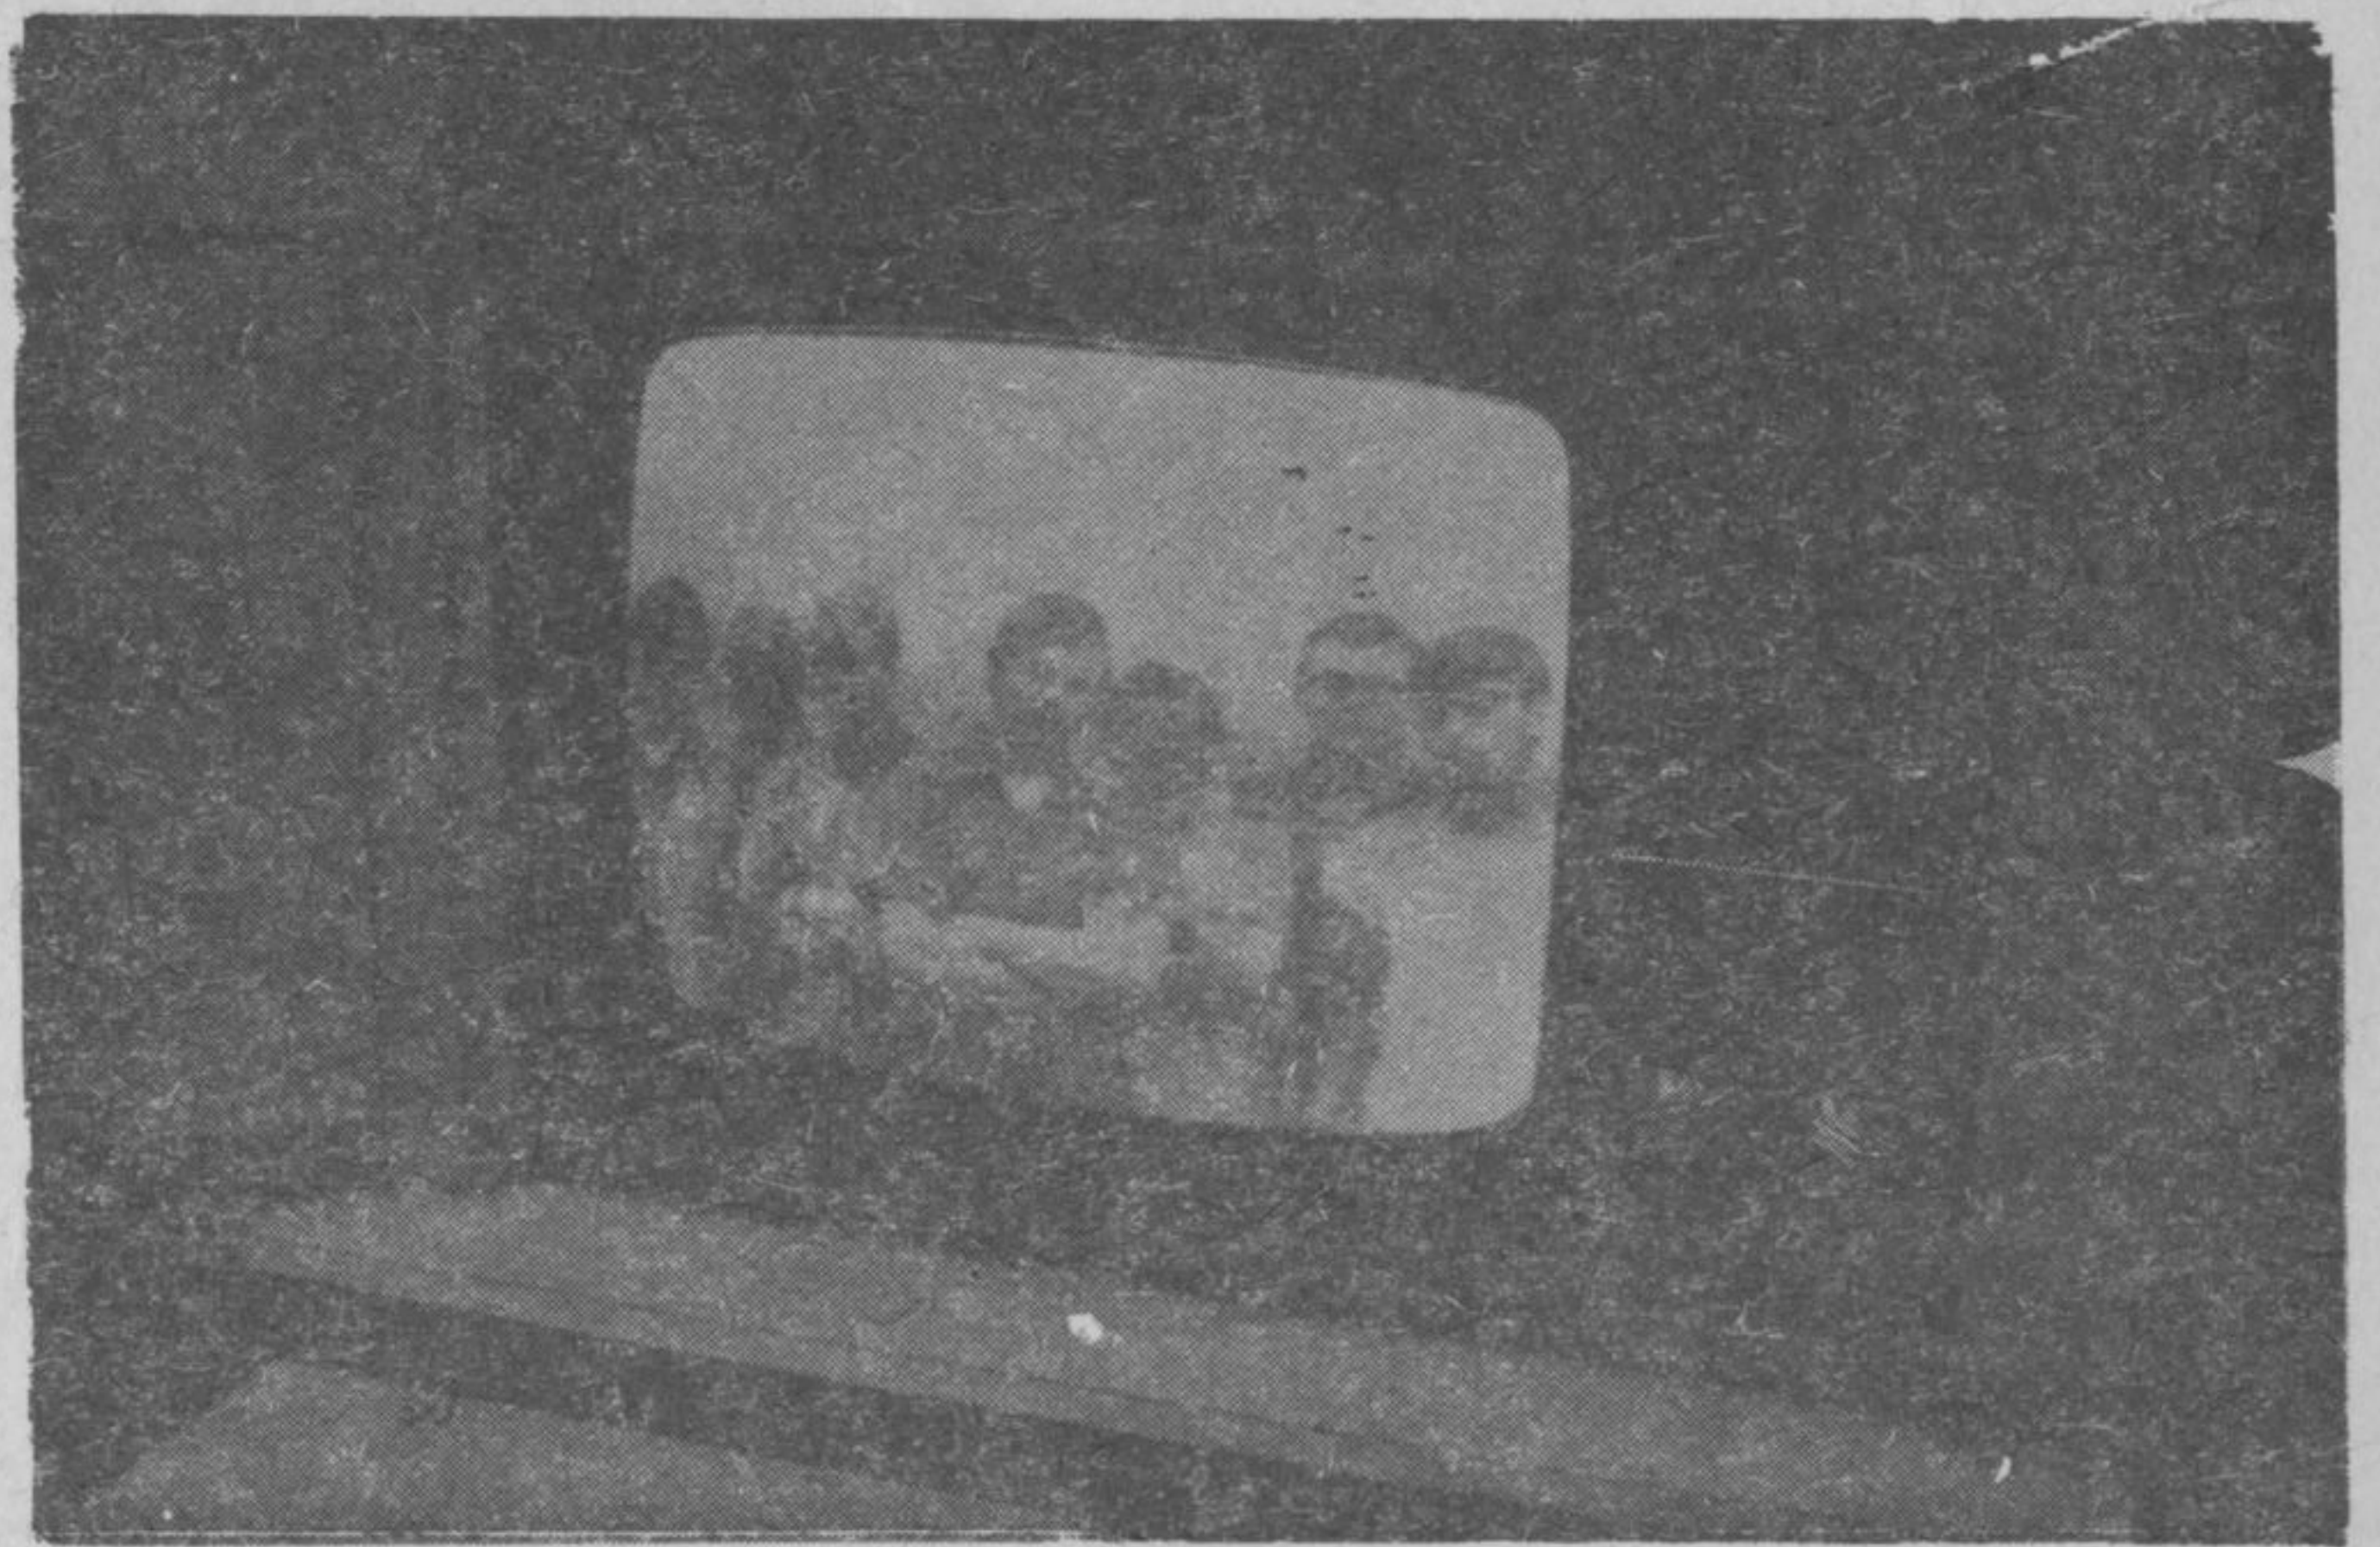

Last Thursday evening Terrace Bay High School hosted the public and high school teachers of Terrace Bay and Schreiber, as the use of the newest equipment to the school was demonstrated by sales representatives.

This equipment (a television camera, a video-tape recorder, and a television receiver developed for use with the preceding) provides the staff and students with many new teaching and creative possibilities.

We will now be able to tape part or all of selected TV programs for viewing at the most convenient time or film for instant replay or later evaluation sports events, drama productions and classroom projects.

The home viewer is well aware of the almost infinite possibilities of TV and we are pleased to now have the opportunity to participate in many of these.

THE 1970 VEGA 2300 - named after the star 'Vega' is the new little car from General Motors that "does everything well". It comes in a sturdy two-door sedan, sporty hatchback coupe, slick KAMTRACK wagon and one-passenger panel express truck. The 90 Horsepower engine is 2,300 cubic centimeters (140 Cu. Inches) with overhead cam and die-cast aluminum-ally block. Compression ratio is 8 to 1. Lightweight and powerful, it is expected to deliver mileage comparable to any in its class.

Wheelbase is only 97 inches and overall length is 169.7 inches yet the Vega seats four comfortably. Shown above is the Vega 2300 Coupe.
