LETTER TO THE EDITOR

" I almost struck a child on a bicycle today as I was driving up Lakeview Drive. Thank God for power brakes!. Will they be as effective next time I need them! Please, Parents, warn your children about staying on the side of the road, facing the traffic. Tell them not to spread out on either side and forget that cars are coming. Tell them not to try to ride their bikes up the hill, they don't have the proper control. They are so little and so care-free especially the kindergarten, grades 1 and 2 children. cont'd next column

Editor's Note

This incident points out the comments made in last week's Council Quotes where a report on the study made by the Department of Highways was made. We repeat part of this report -

"Pedestrians, notably children, show a complete lack of responsible traffic behavior, by utterly ignoring the most basic safety rules for crossing this or any other highway. This complete disregard for traffic represents a hazard and a challenge to even the most careful drive."

"They recommended that, under existing regulations, school crossings would be signed and marked on Provincial Highways by the Department, provided that the municipality or school board gives an assurance in writing that either a Policeman, Adult Guard of School Safety Patrol supervises the crossing during peak hours of pedestrian traffic.

They also suggested a program of educating and training children in traffic safety be instituted as a combined school and community project with assistance and guidance available from the Ontario Provincial Police and the Safety Co-Ordinator, Mr. R. Lewis of the Department of Transport, Thunder Bay
