

Angel's Harp: continued from page 15.....

Pictured here are the representatives from each class and staff who placed wreaths at the memorial. Front Row: John Cebrario (grade 4), Bobby Jacques (2 & 3), Danny Spadoni (grade 2), Blain Bolan (Kindergarten), Gail Beauparlant (grade 1), Anne Marie Borutski (grade 3). Back Row: Pat Stokes (grade 8), Mary Jo Ryan (grade 7), Kenny Duffy (grade 6), Mr. John Small (staff).

Congratulations are extended to Mr. Speck and the grade 8 class for a most dignified and moving Remembrance Day Program.

ONTARIO TEACHERS' FEDERATION SCIENCE PROJECT:

WHAT IT IS

The Ontario Teachers' Federation Science Project is a "learning by doing" program designed to involve both students and their teachers in science activities. More than 1,000 schools in Ontario are now participating in the program which has been evolving since 1963.

O.T.F. hosted a workshop this week at Augustine's Seminar Centre near Baird. Thirty-four teachers from local and outlying schools were in attendance. Instructors were John Small, Holy Angels School, Schreiber and Roland DelGuidice, St. Hilary's School, Red Rock. The instructors were assisted by Casey Gehrels, Science Consultant, Department of Education, Thunder Bay.

Designed primarily for students in Grades 5 to 8, the program introduces them to a wide range of scientific experiences and equipment. It helps them develop judgment, confidence, manual dexterity and a knowledge of how a scientist thinks and works.

For the teacher, the program offers a combination of published units (teaching guides), familiarization workshops, refresher workshops, leadership development and an introduction to equipment design and production.

Initially, the program was developed under the sponsorship of the Ontario Curriculum Institute and later the Ontario for Studies in Education. Since 1968, OTF has conducted the workshops and is now responsible for the entire program, including research, development, production and administration.

Future development will include both elementary and secondary schools.

"THE OWL'S HOOT"

A sense of humor is the pole that adds balance to our steps as we walk the tight rope of life.

William A. Ward

"HONOUR ROLL"

The following Schreiber High School students achieved an average of 75% or more on their first report card for the 1970-71 school year.

1st Year Students:- Mary Bourke, Cathy Cocks and Kevin Scott.

2nd Year Students:- Mary Costa, Alan Turner and Maria Veneziano.

3rd Year Students:- Clover Dukes, Kathleen Guina and Sharon Scott.

4th Year Students:- Lynda Fontaine and Rosemary Speziale.

5th Year Students:- Arthur Dorland, Pat McParland and Sharon Smith.

Congratulations are extended to the above mentioned students for their excellent effort and achievement.
