

Open Letter - cont'd

The appearance of Mr. Steele the regional super-intendant of the department of education only aggravated the situation. He displayed an inexcusable ignorance and lack of information. Mr. Steele underestimates the average intelligence of Terrace Bay. He definitely should have stayed home.

No one questions the necessity to alleviate the excessive costs of education. However at the school level appreciable budget changes are restricted.

Many voices throughout the province have been raised calling for a review of the establishment of the district educational board with its ridiculously high salaries and operating costs. Queen's Park is passing the buck. Queen's Park is responsible for the present sad state of our educational program.

Queen's Park must accept the responsibility of a lot of injudicious spending resulting in the building of large expensive quasi empty schools.

I would like to direct questions to Queen's Park.

Is the District Educational Board as presently constituted, justifiable? Is it overstaffed, overpaid or in overabundance?

Signed - J. Adamo.
