

Diabetics Meet - cont'd from page 18

in Schreiber to meet with diabetics, their relatives and friends, from both Schreiber and Terrace Bay. Dr. A.B. Adey, of Terrace Bay, chaired the meeting, introducing Dr. A. Hawkins, director of the Association, John Lockwood, president and Mrs. Lockwood and Miss Gertrude Klassen, dietician, of the General Hospital.

Mr. Lockwood said the discovery of insulin had given new hope to diabetics of leading a normal life.

Dr. Best, about 1940, felt that an association of diabetics would be most beneficial to both patients and doctors, and the original chapter was formed in Toronto with other groups now organized from Newfoundland to Victoria. Their main purpose to teach the diabetic to help himself and others with the same problems.

The Lakehead association, with 150 members, has formed several very active committees to co-ordinate their work: Publicity - to study the latest developments; in the field hospital visiting - done every week; camp arrangers for vacations for diabetic children where, under supervision, they enjoy a holiday with others of their age and with the same problem.

Dr. Hawkins stated a two day clinic has been arranged for the Lakehead, to which the public is invited. The date, sometime in the Fall, will be publicized.

There will be two specialists attending, Dr. Earlich, of the Toronto Sick Children's Hospital and Dr. McKendry, with one of his staff, from the Ottawa General Hospital.

Dr. Adey thanked the visitors and Miss Sharon Brown, Public Health Nurse, who had made the arrangements in Schreiber.

Following the meeting coffee was served and an informal hour of visiting enjoyed.
