In order to operate a successful program for the boy we must have adult help (leaders, ways and means committee, scout hall committee, etc.). Parents must indicate where they will be willing to help.

A short meeting will be held prior to registrations in order to answer any questions parents may have.

PHASE 2 OF DESIGN ADOPTED: McKEOUGH

"Mr. McKeough listed the main goals of Government: 1) To create at least 18,000 new jobs over the next two decades, encouraging economic expansion especially in a system of growth centres; 2) To diversify the regional economy through those industries suited to the potential of the region; 3) To expand and strengthen the resource-based industries; 4) To provide more effective transportation and communications for economic growth and social welfare; 5) To improve and strengthen the social infrastructure

The minister said implementation of the development plan will involve a combination of provincial department programs, together with strong participation at the federal regional and municipal levels.

"We have already begun the costing process," added Mr. McKeough, "and in due course we will be able to estimate the costs to be borne by various provincial departments and other levels of government"

A major recommendation from the Northwestern Ontario Development Council that economic measures be implemented within a five-year, rather than a 20-year, period was not accepted by the Government.

".. the target and time period as stated is a realistic one," stated Mr. McKeough. "In other words, it seems proper to concentrate on attainable objectives."
