Four members of the present crew, Harry Coe, Reg Cotton, Harvey McCanna and Hugh Brophy, have been members of the department during the 23 year period that this record was being established.

The Technical personnel are involved in various types of work assignments including equipment inspection, process testing and laboratory analysis and are exposed to all of the associated work hazards encountered in a mill operation.

This outstanding safety record achievement can be attributed to the work of their department safety committee and a personal desire on the part of each crew member to perform their work in a safe manner.

To mark the occasion a coffee and doughnut get-together was held. This will be followed by a dinner for the members of the department at the Terrace Bay Motor Hotel in recognition of this outstanding safety record.
