

SCHREIBERADVISORY VOCATIONAL COMMITTEE

The February 16, meeting of the Advisory Vocational Committee (Lake Superior Board of Education), was attended by three trustees, four appointees, three school principals, E.J. Morgan, Director of Education, M. Vasko and Mrs. M. Moloney, Program Consultants.

The problem of the provision of educational opportunities of a vocational nature to students of this jurisdiction was presented. In view of the rather static enrollment (with slight increases in secondary enrollment for the next two or three years with corresponding drop in elementary enrolment), there is no possibility of adding programs, but rather a matter of substitution and no building expansion is possible in the near future.

The program consultants made thorough presentations regarding the new philosophy and practices involved in the industrial arts and home economics programs.

It was pointed out that for conversion of existing facilities to accommodate industrial arts and home economics, there is a 90 per cent grant on structural work involved and for equipments grants up to \$12,000 for industrial arts \$7,000 for home economics, (general) \$6,000 for foods and nutrition room, and \$6,000 for clothing and textiles room.

As no grants were received previously for conversion of the Manitowadge High School, the grants for structural changes are still available there.

Room sizes - Home economic, all purpose - 1200 X 1350 sq. ft., Food and Nutrition - 1100 X 1350 sq. ft., clothing and textile - 1000 X 1250 sq. ft.

It was suggested that: (a) industrial arts and home economics programs be expanded in the Manitowadge High School to allow for a program in years one and two, covering drafting, electricity and electronics, woodwork, welding, and power mechanics, with specialization in two areas in years three and four - It is hoped, to be ready in September 1972.

(b) industrial arts and home economics to be introduced in Marathon in either the public or the high school to be determined as soon as possible.

Home economics will be introduced in Lake Superior High School in September 1972.
