NEW LIGHTING

It was with the utmost satisfaction the hydro commission and municipal council in Schreiber watched the new lighting on the highway, where it traverses the town, go into effect on July 10th.

The project has been underway for five years, delayed by construction on the road, and the local pleasure was shared by Ed. Armstrong, of the Ontario Hydro, Thunder Bay Sales and Service Supervisor. The highlight intensity is produced by a Lucalux light bulb which is a long life intensity source of illumination.

These bulbs are also anti-glare, a protection for motorists and thus a safety feature, producing a good level of light on the road, an added factor in pedestrian safety. The aluminum poles are a clean, modern design.

The line, with all cables underground, circles Schreiber, from the Lakeroad hill to the east end of the town.

It has been installed at a cost of \$19,000. 50 per cent of which is borne by the Ministry of Transportation and Communication, and the balance by the Schreiber Hydro Commission, the latter being most grateful to Jim Tarling, Consumer Service Supt.; and Ed. Armstrong, both of Thunder Bay, for their advice.
