**TODAY'S CHILD**

BY HELEN ALLEN

THE TORONTO SUN SYNDICATE

**ALWAYS HELPFUL**

Joseph's personality is just like his smile — friendly, diffident, good-natured, appealing. Joseph is eight, a slender lad with dark eyes, brown curly hair and medium complexion. His ancestry is black and white — with an Irish background.

In good general health, Joseph wears glasses for near sightedness and has a slight hearing problem. It does not hamper his listening ability and his speech is normal. Indeed, he is a talkative youngster who responds eagerly to conversational overtures.

Joseph attends opportunity class and his future education will be along non-academic lines. He works well in school, joining enthusiastically in group projects and always contributing to class discussions.

There is a TV repairman in Joseph's foster family and the lad's great delight is to have the intricacies of a television set explained to him. All mechanical things interest him and he wants to know how everything works.

Joseph is likeable and co-operative, always willing to be helpful and normally cheerful. An easy-going fellow, he gets on well with other children.

This boy needs parents who will give him a great deal of love and encouragement, but will not be demanding about scholastic achievement.

To inquire about adopting Joseph, please write to Today's Child, Box 888, Station K, Toronto. For general adoption information, write your Children's Aid Society.
