THE INJURED WORKMEN'S CONSULTANTS

The Injured Workmen's Consultants is a charitable non-profit Crown Corporation. It was incorporated in 1971 by Mr. and Mrs. Allen Baldwin, who are president and secretary-treasurer respectively.

Our purpose is to assist industrial accident victims to overcome the difficulties often encountered on obtaining their legal right to compensation as defined in the Workmen's Compensation Act. We do this by providing expert advice, assisting workmen in assembling the necessary documentation of their case and by representing them in claim hearings before the Workmen's Compensation Board (W.C.B.).

A workman's claim at the W.C.B. depends primarily on medical evidence and it is through this evidence that we are able to prepare a workman's case in such a way that he is able to get maximum compensation.

We are prepared to assist any injured workman in obtaining fair compensation from the W.C.B., and welcome inquiries. continued page 14.....
