

**Mutch Tours Riding-cont'd**

Ike is very interested in learning from the voters themselves what they consider to be the problems of their community and the government's in general. Many problems were presented but the major ones causing extreme concern were the present governments' allowing sale of Canadian land to non-Canadians and the ability of large corporations to find so many loop holes in our present tax laws to enable them to avoid little or no tax payments.

Ike's answer was "This situation should never have been allowed to exist and action to stop such exploiting is long overdue. When elected, it is my intention to do everything possible to prevent continuance of such practice."

On the weekend of August 26th, Atikokan extended Ike a very enthusiastic reception. N.D.P. Members in that community assisted Ike in door to door visiting.

When Ike was asked what impressed him most throughout the Riding, he stated that it was the enthusiasm of the New Democrat Platform and the terrific increase in paid up Party Memberships.

**We  
deliver.**

**The rest is up to you.**

Delivering a constant flow of power, dependably and safely—that's your Hydro's round-the-clock responsibility. And because electricity provides so many services so dependably, most homeowners can take it for granted.

And yet, in many homes over ten years old, the quality of service is severely restricted—simply because the wiring is outdated and inadequate.

Rewiring can make a world of difference: In *convenience*, by providing ample outlets and switches where you want them. In *performance*, by bringing full power to your

appliances so that they can operate at peak efficiency. In *safety*, by eliminating the hazards of an overburdened wiring system. Good reasons for giving top priority to your home wiring when you consider making improvements.

To find out what rewiring can do for your home, call a qualified Electrical Modernization contractor. And ask him about the Hydro Finance Plan—an easy way to fit the work into your budget.
