

Why should you have to sprint to get a hot shower?

An oil-fired heater can give you up to 30 gallons of hot shower water in 20 minutes.

It's morning shower time in some homes, this is what happens. Dad gets on his mark. Sets. And there he goes. If the family beats poor old Dad to the shower and uses up all the hot water, he may not get a hot shower at all. Not unless his house has an oil-fired water heater.

Oil can heat water 3 times as fast as gas; 6 times as fast as electricity. So it makes a lot of sense that an oil heater is going to

give your family more hot water faster for hot showers, and washing soiled clothes. Not to mention the pile of breakfast dishes.

Oil really does heat faster. It's a fact we can prove. If you're not heating water with oil now, sprint to your phone and call us on our hot line.

In 1871 and again in 1883 farmers in Ontario were paid 25 cents by their municipality for each tree they established on boundary lines of farms or along the highway.

When you donate blood to the Canadian Red Cross you give about a pint—less than one fifteenth of the average body's blood content. The plasma portion of the blood is replaced within 24 hours.
