Plans for the Future:

- a) upgrading the facilities in the Manitouwadge High School
- b) introduction of home economics and industrial arts in Marathon for elementary and secondary pupils
- c) establishment of accommodation and facilities for the Trainable Retarded in the Marathon High School
- d) closer integration of the curriculum at the Grades 7-10 level
- e) establishment of a more effective programme of professional development locally
- f) review and assessment of present programs

Conclusion:

Much has been done, but there remains much more to be accomplished in the future. The task of reorganization is drawing slowly to a close. It is expected that our legal disputes will soon be settled, and evaluation of assets and liabilities completed through a hearing of the Ontario Municipal Board. The apportionment problem for local taxation appears to be in the final stages of settlement. Newer methods of budgeting are emerging which promise to place the Board in a position whereby requisitions can be presented to local councils in March. More time in the future can therefore be spent upon matters which are educational in nature (with the educational needs of the students receiving top priority) which should make the role of the local trustee more interesting and satisfying.

We often talk of equality of educational opportunity in Ontario. Our foremost task is to bring about equality in the division, not by reducing our education to a lowest common denominator, but by improving the educational system in all areas to the highest standard. As a result, some communities will benefit more than others at the beginning, but all will and have improved.

I wish to thank the present Board for the time, effort and keen interest shown. Your co-operation and encouragement is appreciated.
