

Get pollution off your chest.

And regulate its transportation and disposal.
 2. We study recycling as an aid to reducing quantities of waste and to avoid depletion of our natural resources.
 3. We control the use and application of pesticides which are unacceptable for pollution reasons.

Water Pollution.

1. We protect all of Ontario's water sources from pollution.
2. We develop and control surface and ground water resources.
3. We watch all potential sources of industrial and agricultural water pollution.
4. We plan, build and finance modern sewage and waterworks facilities for Ontario municipalities.
5. We supervise all private waste disposal systems.

Ontario has some of the most comprehensive legislation in North America to protect our environment. But it will take the effort of everyone to solve our pollution problems.
 Won't you help?

Ontario is a fast-growing province—more people, more vehicles, more factories, more machines every day.
 With that growth comes the threat of damage to our environment. Pollution of all kinds.

The Ministry of the Environment is Ontario's guardian of our air and land and water.

Here's who we are and what we do:

Air Pollution.

1. We monitor the air for pollution and order corrections if unacceptable levels occur.
2. We track down strange odours in the air and many things you can't smell and eliminate them if they are dangerous.
3. We investigate suspected air pollution injury to people or property.
4. We are responsible for noise pollution and are creating enforceable noise control measures.

Land Pollution.

1. We deal with all the leftovers of our affluent society—the industrial waste, processed organic wastes, and ordinary garbage.
