BICYCLES ARE NOT TOYS

The bicycle that your child rides is not a toy. Although it is used as a recreational conveyance it is a vehicle within the means of the Highway Traffic Act of Ontario. Each year, many children take an untimely ride and a quick rendezvous with death because the bicycle they were riding was being used as a toy.

As you are probably aware, the Ontario Provincial Police carry out an extensive safety program in elementary and secondary schools across the Province in an effort to teach safe bicycling habits and to instill a sense of responsibility in the minds of these young drivers when operating these vehicles on roads and highways. However, this can only be accomplished with the assistance of the adult population. A bicycle, like an automobile, should be checked regularly to be sure it is mechanically fit. A bell or horn in good working order must be attached to the bicycle as well as a light if the bike is ridden after dark. continued page II
