

The Glad Brothers, Earl and Tim, have done it again! Another coup, in moving Earl's home a 28 x 56 residence, some five blocks away to another site, on which the cement foundation was poured last year, and of course, the home fitted perfectly on it. There were a few hairline cracks in the home and one cracked mirror tile in the bathroom.

To top the tale, Mrs. Glad, the children and the crack stayed in the building while it was being transferred.

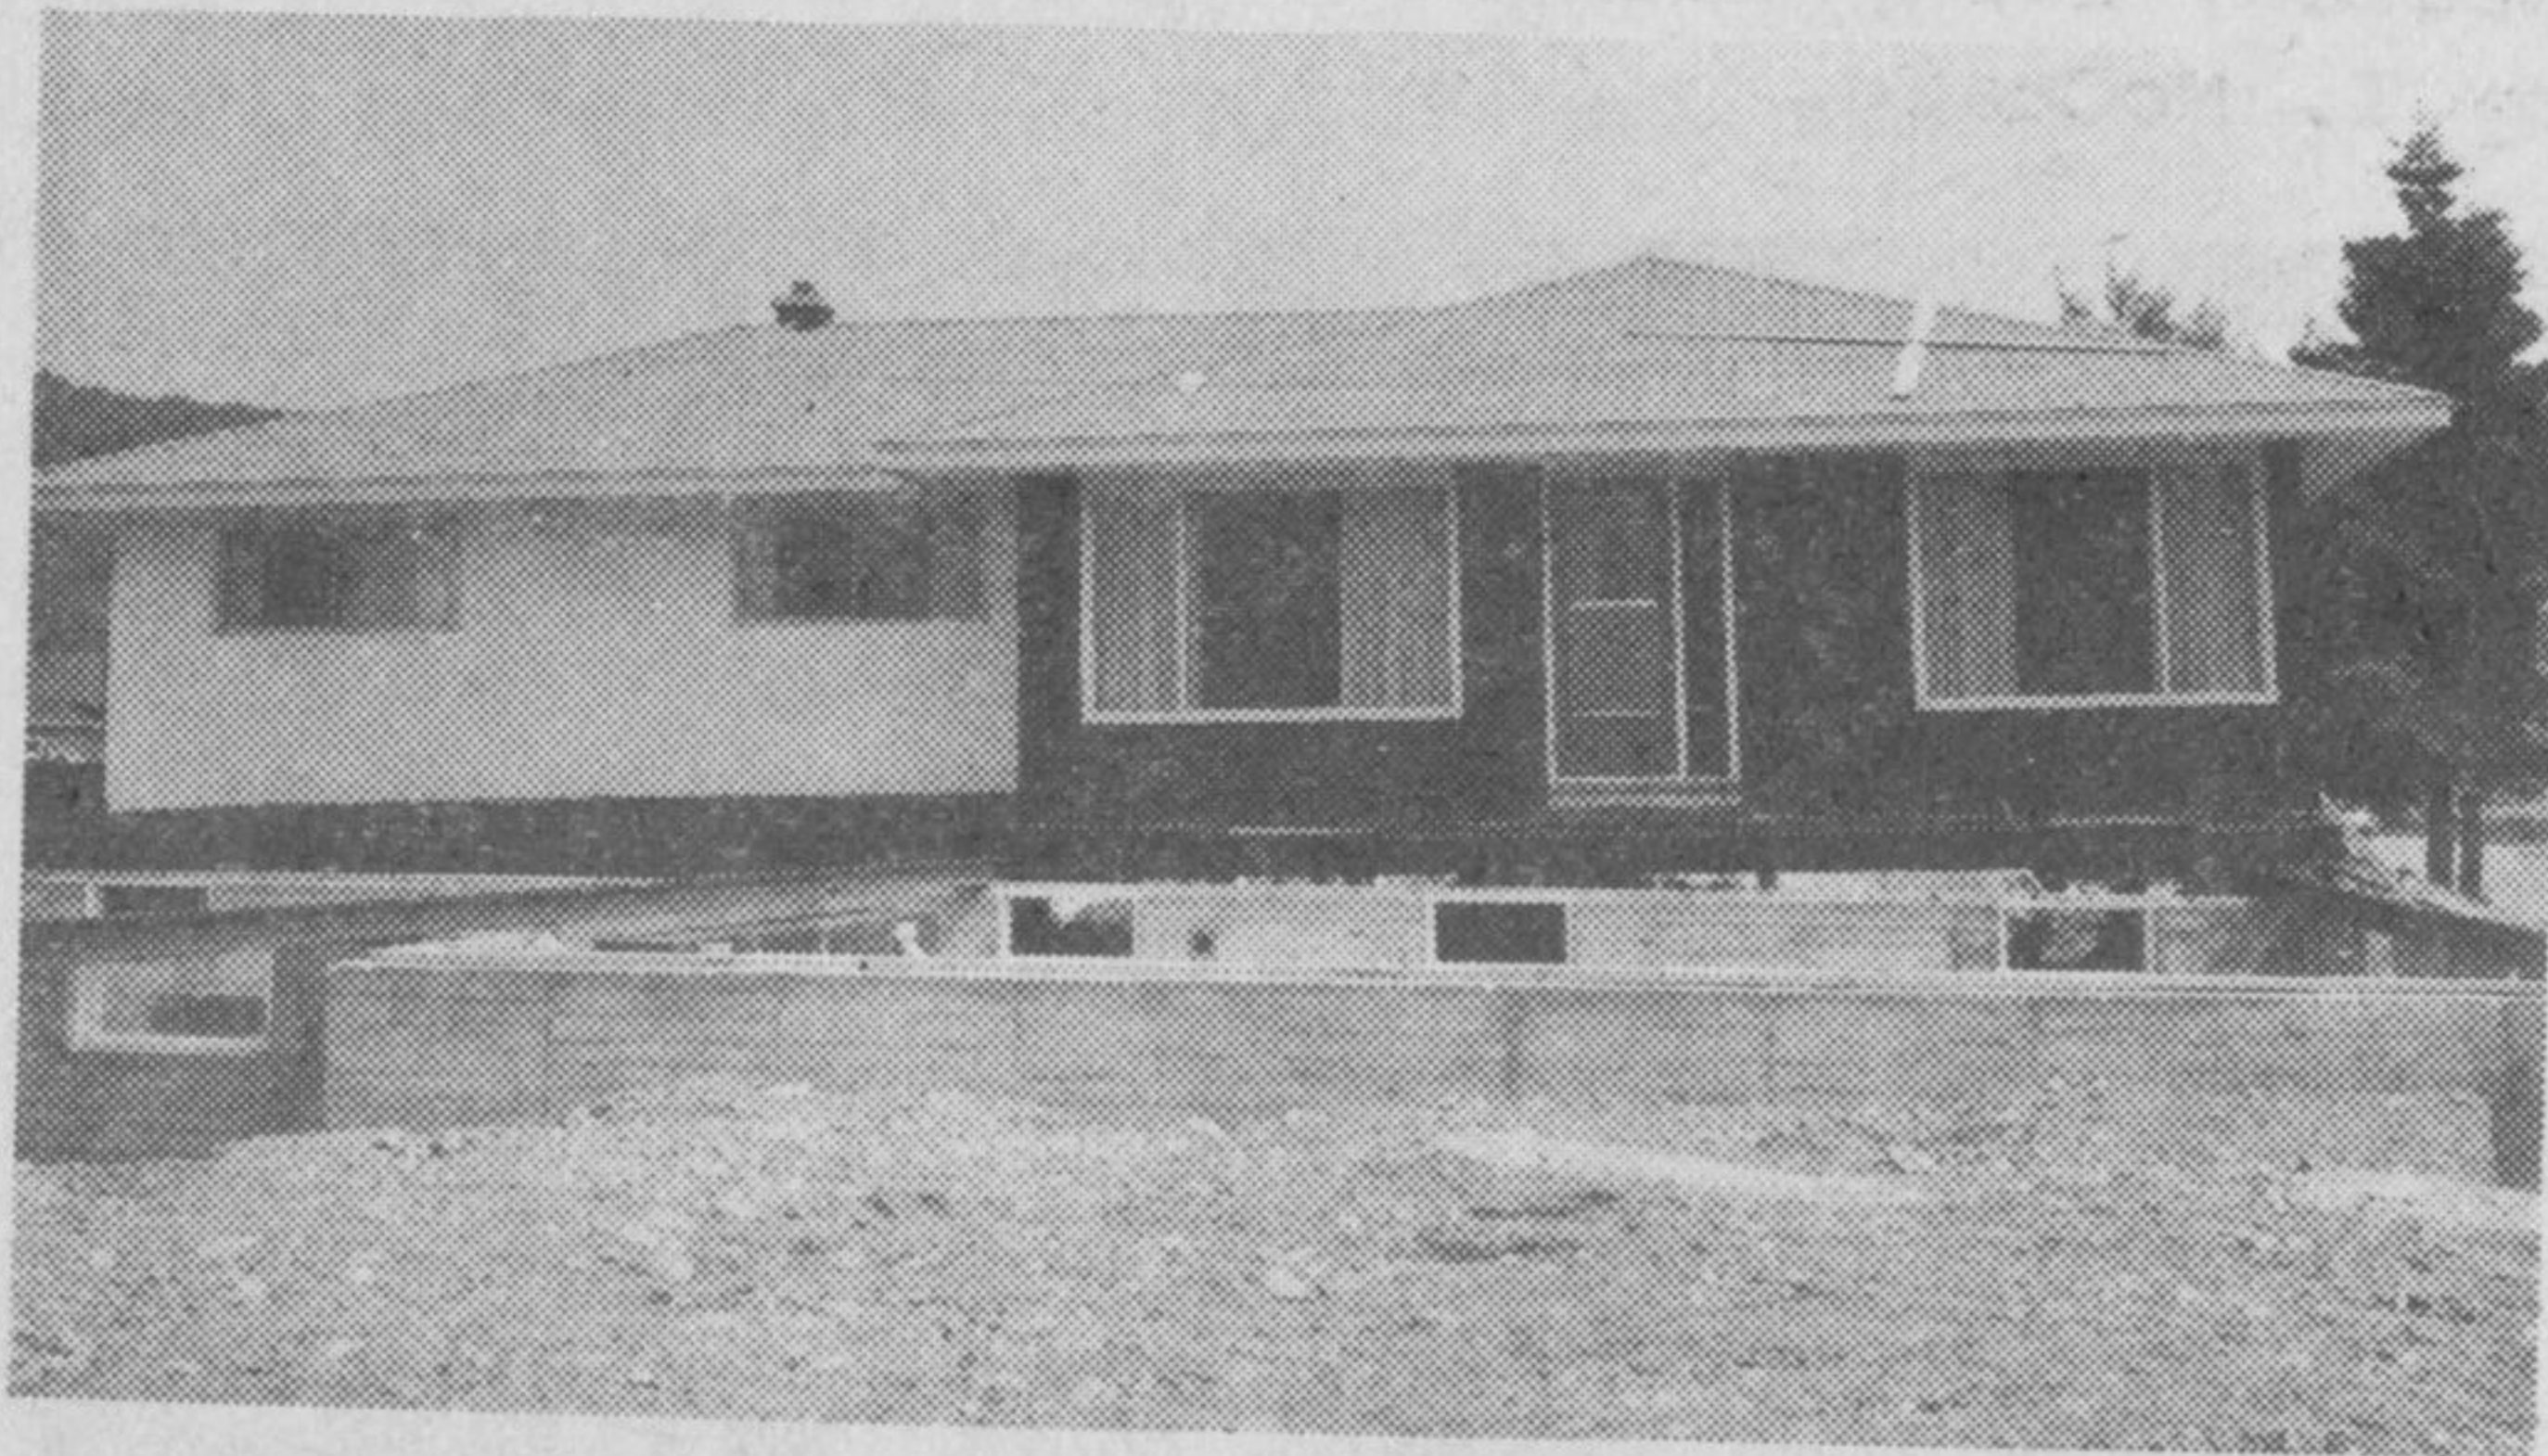

Earl and Tim made the moving apparatus, no small achievement and for their newest project, the construction (well-underway) of an Esso Voyageur complex, they built a saw mill, and cut the boards and of course are the contractors and builders.

This last venture is providing the long-wanted coin laundry in Schreiber.

Photos taken by John Kuczma. Earl Glad, grandfather Bill Glad, Tim Glad and his son Terry.

Earl Glad's home on new site.

Mr. and Mrs. Danny Rooney (Carol Dimmery) of Thunder Bay are visiting with Mr. and Mrs. Henry Dimmery and other friends.

Diane Huard is away visiting her sister Mrs. Angie Hanchiek of Mississauga and later will move on to Smith Falls to visit Mrs. Evon Hewston.

With baffling consistency, Mrs. Stella Kuczma - the greenest thumb in town, again, despite poor weather has produced her marvelous crop of vegetables - and her 100 big jars of dills are safely stowed away.

Relations, friends and the United Church Fall Fair anxiously await the harvest - since of course, they are the ones who will benefit for in no way, can Mrs. Kuczma and her son John consume the fruits of her garden-each year.

Photo below shows Mrs. Kuczma admiring some developing cukes in her greenhouse.

Photo below shows a view of the greenhouse, resembling a tropical forest.

Steam Speeders

The first steam-powered automobile in the United States made its appearance around 1892 and had a top speed of 8 miles an hour. By 1906 an American-built Stanley Steamer held the world's speed record for automobiles: 127 miles an hour.
