A ONCE-IN-A-THOUSAND LIFETIMES OPPORTUNITY

From November 1973 through January 1974, you'll be able to see and photograph a remarkable sight that will not be visible again from Earth for more than 1000 lifetimes --- the KOHOUTEK (pronounced Kah-HOE-tech) Comet.

Its existence was discovered in Hamburg, West Germany, by Czech-born astronomer Lubos Kohoutek in March of this year. It is predicted that the comet will be nearly as bright as a quarter moon. The head may be as much as half the size of the moon, and the tail is expected to stretch approximately one sixth of the distance across the sky.

The best time for viewing and photographing the comet will be in early evening hours from January 10th through the 20th. During this period the moon will be in its waning phase, the brightness of the comet will still be very good, and elevation above the horizon will be great enough to make viewing easy. However, it will be visible to the naked eye in the predawn sky in late November, and is expected to be closest to the sun and at its brightest on December 28th.

Many factors will determine the amount of exposure necessary to photograph the comet: its brightness and distance from the sun, atmospheric conditions, your location, etc. In addition the equipment and film you use will be a determining factor in whether or not you can obtain good photos. General speaking you will need a camera that has a fast lens (f/4 or faster) and is capable of making time exposures. Fast films are recommended. Kodak Tri-X Pan film for black-and-white pictures

REMEMBRANCE DAY TEA

The Ladies Auxiliary to the Royal Canadian Legion, Branch 223, Terrace Bay held their annual Remembrance Day Tea in the Legion Banquet hall on Saturday afternoon. Mrs. Dorothy Koski and Mrs. Audrey Smith were co-conveners.

Throngs of ladies came out to view the home baking, the novelty table, knitted articles and children's table.

Mesdames Jeannette Gunter, President; Jean Megraw and Stella Gusul poured from a lace covered table, centred with the traditional Poppy display.

A cake made and donated by Mrs. Anne Latour was won by Mrs. C. Wise.

Another draw, a carriage coverlet and pillow, made and donated by Mrs. Ida Romanuk, was won by Mrs. D. Rattray.

Tea was served at individual tables, by various members of the Auxiliary.

Mrs. Jessie Macadam, a Charter member of the Schreiber Auxiliary, No. 109, and now a resident of Birchwood Terrace, Home for Senior Citizens, was the oldest lady at the tea. Mrs. Macadam will be 80 years old on December 20th. Photo by Mrs. M. Lundberg.
