Games over 200 were: F. Figliomeni 225; C. Commisso 249, 203; P. Buso 212, 297, 201; L. Fournier 212; L. Imbeault 288, 258; J. Wilson 220; R. Imbeault 228; M. Smilsky 233; K. Furyk 212; J. Gross 291; P. Buck 223; M. Reid 215, 217; S. Reid 208, 215; L. Hiebert 201; E. Boutilier 234, 225, 253; C. Buck 258, 311, 217; D. Tilbury 288; B. Tilbury 227; W. Cameron 225, 217, 219; J. Imbeault 222; D. Imbeault 209, 210; A. Jean 238, 280; J. Cameron 247, 205

## TERRACE BAY POLICE DEPARTMENT REPORT

A total of twenty-four occurrences were investigated by the Terrace Bay Police Department last week.

Two break, enter and thefts were reported which resulted with one juvenile being arrested for one offence and the stolen property recovered on the second offence.

Four cases of theft under \$200. are presently being investigated.

One case of fraud of \$800. was reported and the present whereabouts of the suspect is being investigated.

Two accidents occurred during this period with minor damages involved in each.

Two fires were extinguished with minimum damage.

Five motor vehicles and three transients were checked.

A fifteen year old girl from Ottawa who was reported missing, was located and returned

Numerous complaints have again been reported of dogs running at large. A minimum of

\$25.00 is the fine imposed for having a dog running loose. The police are reluctant to enforce this law but if citizens will not take care of their own dogs the police will have to instigate action against the owners.

During the past week by instructions from the Attorney General the Recreation Committee was advised that the pin ball machines in the games room were illegal. These have been shut down and are expected to be replaced with machines that comply with the law.

## NEWZETTE

Edited by Tom Slater

Remember Saint Jean Vianney, the little Quebec town that was partially engulfed by a huge land movement in April 1972, killing 31 people and leaving a canyon half a mile wide, a mile long and 100 feet deep? How would you feel if a yawning hole like that were growing steadily in the bush out behind your hometown?

The people of Marathon, Ont., pulp and paper town on the north shore of Lake Superior, don't quite know whether to be proud or concerned about their grand canyon in miniature: whether to treat it as a menace or a tourist attraction.

"It's 16 miles from town ... but the hole is getting bigger and bigger," Marathon reader Laurie Morgan wrote to Panorama. "It is being formed by the movement of underground streams. I can remember when the hole was about one-third of its present size, and that was only eight years ago!"

Panorama called K.E. Bowlier, senior operations officer for the Ministry of Natural Resources in nearby Terrace Bay. "The first thing to say," said Bowlier, "is that it's no danger. At least not in this century". But he did admit that "what was once simply a gravel pit is now a crater of huge proportions."

Bowler, who says he's keeping his eye on the hole (he's visited the site at least a dozen times in the past three years) says the only current danger "is to people who want to see it and stand too close to the edge. It's a long drop." He estimates that the crater is about one-third of a mile long by one-quarter of a mile wide, with a depth of 100 to 150 feet. His department estimates that about six to eight million yards of material has been displaced - the equivalent of 100 tandem trucks hauling 10 loads a day for 20 years. The land movement has engulfed a portion of two roads and a considerable amount of treed land.
