week ahead BY DR. A.W. DAMIS

Forecast Period: February 2 to February 8

Throwing out subtle "feelers" about a long term plan... will be received with little or no enthusiasm. It would be a good idea to keep your future objectives—to yourself.

This cosmic cycle, you are entering an emotionally low mental phase. So, it's likely that you'll over magnify any adverse news—connected with the other sex.

Quitting your job or project, at this time, is out of the question. None-the-less, the thought of "throwing up your hands" will haunt you for the next few days.

This coming week will be favorable for contacting the general public. So, if you are involved in sales or a similar occupation—look for good things!

It's true, you're putting much, much too much, effort into your job or project. Really, it's time for you to let up and take off the pressure.

It's possible for you to over estimate your ability. Experience gained in the far distant past is now outmoded. Approach your job, task or project, cautiously.

Oddly enough, you're going to welcome an interruption in your daily routine. Postponements, during this cosmic cycle, take on a, surprisingly, pleasant twist.

It's the same old medicine in a new bottle. Take care, there's indications that a member of the opposite sex—will take you for a financial ride.

There's questionable advice in your chart. It seems that most members of your sign should follow dictates of the heart. So, logical thinking might be troublesome.

A build up of obligations could cause most members of your sign... domestic problems. Check with home base before you commit yourself to an outside schedule.

There's no cause for alarm. Stellar patterns could trigger a feeling of being restless, for no particular reason. Throw yourself into a new project or interest.

Take care, news is heading your way that will not be appreciated—if you pass it on to your routine associates. In other words, good news for you—could be bad news for someone else.
