## week ahead BY DR. A.W. DAMIS

Forecast Period: April 6 to April 12

19 Jolly Jupiter, ever so gently, smiles on most members of your sign. Given an equal set of circumstances, Aries will overpower any competition.

20 Things look good in affairs of the heart. Incidentally, you're off the hook! Meaning? Clandestine activities are no longer a worrisome problem.

20 At last! You'll be in touch with persons who believe as you do. According to your chart, there's shelter from the twin wolves—jealousy and envy.

22 There's a few changes in your job, task and project, coming this week. If you apply self discipline—all will go well.

22 You'll be in the mood to give up a few bad habits. No question about it, a member of the opposite sex will trigger your desire to improve.

22 Making friends won't be your strong point, this week. As a matter of fact, an associate might affect your health or budget, adversely.

22 If you are thinking in terms of marriage or a similar alliance, things look good. There's one problem, however. Finances and/or employment should be considered.

21 You might find yourself as taut as a bow string. The planet Uranus pushes you into a nervous and indecisive state. Postpone major decisions.

21 Cosmic cycles burst, suddenly, and spray your chart with heretofore undisclosed secrets. It seems as though you'll discover things that have been hidden, in the past.

19 Most members of your sign will hear about a way of improving their earning power. This information will arrive from a far off place.

18 It seems as though you'll take a rather unreasonable attitude toward your job task or project. Whatever, it's not a good time to air a grievance.

20 There's good news in the way of monies or earning power. Your relationship with the opposite sex might be a little frustrating, however. Also, avoid the dark glasses of pessimism.
