Don't waste a drop!

After the furnace, the water heater is the biggest user of energy in your home. Waste hot water, and you're wasting valuable energy.

That's a good reason for getting full value from your water heater in every way you can. By fixing leaky faucets. By insulating long runs of hot water pipe. By waiting until you have a full load before you switch on the clothes or dishwasher. By using cold or cool water when it will do the job. By taking shorter showers or shallower baths. By making sure that all the hot water that eventually goes down the drain works hard for you before it goes.

The Cascade electric water heater gives you a dependable supply of hot water and it makes good use of all the energy it consumes. But it's up to you to use hot water wisely. Don't waste a drop.
