(support the Star's in our bid for the championship)

### NOTICE SCHREIBER HYDRO CUSTOMERS

As you are aware, the cost of wholesale power to municipalities was increased 22% on January 1, 1976 by Ontario Hydro.

Approval has been received from Toronto by our Commission to pass on only approximately 15% of this increase to our customers.

This increase will be in effect on all energy used following the March reading and this will be noticeable to the general and all-electric customers on their May account, while the residential customers will receive the increase on their June accounts, because of the bi-monthly billing.

Please take note that in future, all meters that are not accessible to the meter reader, because of snow, etc. will be estimated until such time as they are made accessible.

SCHREIBER HYDRO ELECTRIC COMMISSION
