JUNIOR KINDERGARTEN PROGRAM DISCUSSED AT BOARD OF EDUCATION MEETING

The Lake Superior Board of Education Meeting No. 8/76 was held on Monday, May 17, 1976 at the Marathon High School.

The list of disbursements for the month of April in the amount of \$568,569.61 were approved.

By-Law No. 29 to strike the tax mill rates in the Unorganized Townships of Pic (Heron Bay), Jackfish (Syine), Port Coldwell and Rossport (Lahontan) for 1976 was approved.

It was decided to make application to the Ministry of Education for approval to build an extension to the existing Industrial Arts Shop in Manitouwadge High School. When the addition is completed, it will enable the teachers of the school to provide more practical courses for the students.

Mrs. Averill, Special Education Consultant, presented a Model for the Special Education Program to be implemented beginning September 1976. This program will cater to the special needs of students who have emotional problems and other learning disabilities.

Mr. Saumur, the Principal of Manitouwadge Public School, gave an evaluation of the existing Junior Kindergarten Program in the Manitouwadge Public School. He emphasized that Junior Kindergarten is an Activity Program: that children learn through play: that a child's play is his work: and through play children develop valuable skills for later life.

Mr. Pappas, the Principal of Marathon Public School, reported that the parents at a recent community meeting voted 45:1 in favour of a Junior Kindergarten Program for Marathon. He said that enrollment is now approximately 29 and could possibly increase to 40.

SCHREIBER POLLUTION CONTROL PLANT TO BE OPENED OFFICIALLY ON JUNE 7

Schreiber's pollution control plant will be officially opened on Monday, June 7, according to an announcement by L.F. Pitura, Ontario Ministry of the Environment Northwestern Region Director. The ceremony will take place at the plant site at the extreme south end of Winnipeg Street. The general public is invited to attend and tour the new sewage treatment facility following the ceremony at 2:30 p.m.

The Schreiber treatment plant and sewage collection system, which was constructed by and is operated for the municipality by the Ontario Ministry of the Environment, cost \$2,475,000; 69 per cent of which was subsidized by the Ontario government. Central Mortgage and Housing Corporation, Ottawa provided a loan of \$657,000 toward the municipality's funding, of which 25 per cent is forgivable. The plant has a capacity of 250,000 gallons per day and services the town of Schreiber and surrounding area.

The consulting engineer for the project was M.M. Dillon Ltd., of London, and the general contractor was Environmental Technical Services Ltd. of Hamilton, for the plant, and Northeast Construction Ltd., of St. Catherines for the sewers.

Both Environment Ontario Regional Director Pitura and Schreiber Reeve H.J. McParland will officiate at the ceremony. Government officials from both the federal and provincial sectors, local council members from Schreiber and invited client and business associates of the Ministry and the townships will be in attendance.
