the Tennis Club Steering Committee.

At an open meeting of local Tennis players, it was decided not to form a Tennis club at the present time; however, the steering committee has set up a list of basic rules and a system of scheduling for tennis court uses. These regulations have been posted for everyone's perusal. Anyone with problems or questions regarding the use of the tennis courts please contact the Recreation Office and they will refer you to a member of the steering committee.

POISON CONTROL: MINI FILE IN LOCAL HOSPITAL

Do you know where your nearest Poison Control Centre is located? No! Well, neither do some Thousands of other people in Ontario. If someone in your home eats or drinks some poisonous substance, valuable time could be lost while your doctor or local hospital contacts the nearest poison control centre for information about symptoms and remedies. Ontario Hospital association has wanted to change that by making it possible for all hospitals in Ontario to have a Poison Control mini-file for instant reference. Now they have. It is a bright red binder which lists all common and uncommon poisons, their symptoms, antidotes and treatments. This mini-file was developed in the Regional Toxicology Centre of Laval University in Quebec City and we were permitted to have a copy of it at the Emergency department of The McCausland Hospital.
