

AMENDMENT TO THE HIGHWAY TRAFFIC ACT

If you ride a motorcycle that was manufactured after January 1st, 1970, the following amendments recently made in the Highway Traffic Act will effect you.

All motor vehicles are required when on a highway to display two white or amber lighted lamps on the front and a red lighted lamp on the rear of the vehicle, from one half hour after sunset to one half hour before sunrise and at any other time when, due to insufficient light or unfavourable atmospheric conditions persons or vehicles cannot be seen clearly at a distance of 500 feet or less. Motorcycles must carry two lighted lamps, one white on the front and one red on the rear and if your bike was manufactured after the above date those lights must be on at all times when operated on the highways. Bikes made prior to January 1970 are only required to have lights on when driving at night or in insufficient light due to weather. These new amendments were made for increased highway safety. Be safe, be seen.
