### Chicken or the Egg?

Scientists have settled the dispute over which came first, the chicken or the egg. Reptiles were laying eggs thousands of years before chickens appeared, the National Geographic Society says, and the first chicken came from an egg laid by a bird that was not quite a chicken.

### Barbecue Origin

Derived from the French words "barbe-a-gueve, meaning "from snout to tail," the popular version of the word "barbecue" or "cookout" was first known in Virginia before 1700.
