NOTICE

RE: GARBAGE COLLECTION AND REGULATIONS UNDER BY LAW 488 OF THE TOWNSHIP OF SCHREIBER

Schreiber residents are requested to note that effective September 22nd garbage collection will be made on Wednesday's. All garbage put out for collection must be in a metal container or plastic bag, and no one container of garbage shall exceed fifty pounds in weight. All cardboard cartons or wood crates and similar containers shall be knocked down and securely tied in bundles.

Council of the Township of Schreiber
A.J. Gauthier,
Clerk-Treasurer

Marsh World

Ducks Unlimited (Canada)

HOW DUCKS CHEW THEIR FOOD — Since ducks have no teeth they cannot chew their food. Nevertheless, much of a duck's food consists of seeds of grains, grasses, sedges and aquatic plants that must be ground up before they can be digested. Ducks (and many other birds) take in small stones or "grit" which remain in their gizzard (stomach). The strong muscular action of the gizzard and the abrasive effects of the grit, grinds up the food the duck has eaten.
