

ENGAGEMENT ANNOUNCEMENT

Mr. and Mrs. Gabrielle Gauthier of Kamloops, B.C., announce the forthcoming marriage of their daughter, Monica to Mr. Danielle Bock.

The wedding will take place on Saturday, November 27th, 1976 in Kamloops, B.C.

KILLALA LAKE ANGLING SEASON SHORTENED:

Continued from page 17

Obviously we cannot afford to reduce the productive capacity of Killala Lake. For this reason the Minister of Natural Resources has issued a closed season variation order for Killala Lake prohibiting angling for any species during the fall, winter and spring periods from September 15 to the following June 15. In other words, fishing will be only be allowed during the summer period when the trout are down in deep waters.

We are well aware of the fact that a good number of fisherman have enjoyed winter and spring fishing on Killala Lake. However the production of lake trout eggs from this lake is so essential to our stocking program that it must take priority over sport fishing.

We hope that the sport fisherman will appreciate the importance of the Killala Lake trout to our stocking program and we request their cooperation by adhering to the shortened fishing season for this lake.

PRIVATE HEARINGS AND INTERVIEWS

Arthur Maloney, Q.C. the Ombudsman of Ontario, has announced details of the latest series of private hearings and interviews scheduled for the central region of the District of Thunder Bay - Nipigon, Marathon and Geraldton - on November 16th, 17th, and 18th, 1976.

Members of the Ombudsman's staff will be available on a first-come, first-served basis at the Council Chamber of the Municipal Building in Nipigon, between the hours of 10:30 a.m. and 8:00 p.m. on Tuesday, November 16th, to discuss - in private - any complaints or grievances brought to their attention by any individual or group.

Staff members will be in Marathon, at the Recreation Hall, on November 17th, and at the Council Chamber of the Municipal Building Geraldton on November 18 - from 10:00 a.m. until 8:00 p.m. at both locations.

The hearings in the Thunder Bay district will mark the mid-point in the series of visits to northern Ontario communities, and

continue the Ombudsman's program of making the Office and its facilities available to people throughout the province. A total of twenty-five public and private hearings were held throughout the province. A total of twenty-five public and private hearings were held throughout Ontario during the first year of operation - from Kenora and Thunder Bay in the northwest, to Ottawa and L'Orignal in eastern Ontario, and London, Chatham and Windsor in the southwest. In the current fall series, members of the Office of the Ombudsman will, by December have conducted hearings in the smaller centres of northern Ontario reaching from in the northwest Dryden, Sioux Lookout and Red Lake areas, to towns in the Timiskaming District along the Quebec border.

HYDRO ASKS FOR MODERATION IN CHRISTMAS LIGHTS

As the province heads into winter, Ontario Hydro warns that consumption of electric power goes into high gear, and asks for moderation and conservation.

The return to standard time, shorter daylight periods and colder weather bring, almost overnight, a dramatic jump in daily demands of two to three hundred thousand kilowatts, according to H.K. Wright, Director of Energy Conservation.

This is the time too, when plans are made to brighten the early winter with Christmas lighting displays. While not wanting to reduce the spirit of Christmas, Hydro points out the need to moderate the size of the lighting display as part of its conservation program.

It has also adopted the slogan of "Off until 7 p.m., and off again at bedtime," regarding indoor and outdoor lighting displays for homes, stores and offices.

Hydro does not anticipate a problem in meeting winter power needs this year, but points out electric power consumption continues on a rising curve. Last winter, for instance, five all-time record peak demands were set in successive months. Any savings along the way, such as with Christmas displays, help to keep these increases more moderate.

God wouldn't have
given us feet if he
didn't mean for us to
use them.
