Is there \$15,000 hidden in your house?

If you're a homeowner, you could have up to \$15,000 "hidden" in your house. Money you could be using for the things you want or need... like a car, cottage or household renovations. Your "hidden money" is the equity you've built up in your home with every payment, every improvement, and every increase in property value over the years.

Based on your equity, we could arrange a second mortgage loan for up to \$15,000 at competitive rates. And at HFC there are no bonuses, brokerage or finder's fees to pay.

So come on in. Let us help you find the "hidden money" in your house so you can put it to use for the things your family needs... now.
