Nearly 60 ways to insulate yourself against the energy crisis.

You get them all for the price of the newest Lindal Planbook - yours for \$2. A veritable sourcebook for energy savers, it contains nearly 60 engineered

and tested Lindal home plans. Along with numerous ideas for modifications and Lindal custom design, as well.

And each offers as much genuine protection against heat loss as you're likely to find in any contemporary home, anywhere.

Among their options:

Our standard, energy-boosting cavity wall. Faced with interlocking cedar, inside and out. Fully insulated and nearly six inches thick.

Our new, R 19.95 arctic wall. With double layers of insulation which allow even the framing to be insulated. A wall more than seven inches thick!

Our wood-framed, insulated windows and thermal-break sliding doors.

Our own Alaska-proved, polar-cap roof system. It offers a choice of climate-matched, energy-saving levels - ranging all the way up to an incredible R 42.46!

We're all serious about building a house that conserves energy, not to mention energy costs. And that kind of warm welcome home is here.

Send for your Planbook now. Or go right to the source and pick up a copy at our local display center.

Bringing nature (and energy savings) home.
